Full analysis

Overview

The website is easyCredit, a German consumer-finance platform presenting instant and installment loans, credit calculation, reserved credit availability, flexible repayment, loan servicing, customer support, and mobile account management through partner-bank distribution.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent consumer-credit business model, with extensive loan, support, FAQ, partner-bank, and legal content; observed forms are limited to contact and revocation functions, with no phishing indicators, hidden forms, wallet activity, or untrusted form destinations. The published contact address `0911/53900` is consistent with the site's stated German customer-support function. External reputation checks found no malicious, suspicious, phishing, or blacklist detections, and no brand-impersonation pattern was identified.

- Homepage: German easyCredit branding and detailed consumer-loan content.
- Homepage behavior: 2 successful runs; 0 hidden forms, 0 wallet-provider detections, and 0 suspicious inline scripts.
- Homepage reputation: 0 malicious and 0 suspicious detections; no external blacklist hit.
- Domain history: age 24.186173853524984 years; first seen 2002-05-24T18:32:14Z and last seen 2026-07-07T12:59:45Z.

Regulatory Verification Notes

The site provides legal information, privacy information, customer support, FAQs, and partner-bank references, supporting an established financial-services identity. However, the supplied page evidence does not establish a specific license number or independently verified regulatory authorization; this is a verification and disclosure point, not evidence of impersonation or fraud. The site's transport certificate identifies TeamBank AG Nürnberg, while hosting is provided through NORIS-NETWORK in Germany. The historical record is substantial and continuous, with 1,165 snapshots spanning 25 tracked years.

- Homepage/legal content: Impressum, Datenschutzerklärung, legal information, and partner-bank references are presented.
- Domain archive: 1,165 snapshots spanning 2002–2026, covering 25 tracked years.
- Hosting: Served from AS12337 (NORIS-NETWORK - noris network AG, DE).
- TLS: Thawte EV RSA CA G2, EV validation, subject organization TeamBank AG Nürnberg, valid to 2026-12-19T23:59:59+00:00.

What to Verify Next

For institutional onboarding or a regulated transaction, confirm the responsible lending entity and applicable authorization through the relevant German financial-services registry, and validate official support channels using independently sourced corporate contact information.

- Homepage: States the consumer-credit and installment-loan business model.
- Legal pages: Provide the relevant Impressum and legal-information locations for entity verification.
- Support content: Provides customer-service information and loan-management channels.

Summary Verdict

The website presents as a legitimate, established, and trustworthy financial-services platform. Its consistent identity, mature content, clean reputation, long operating history, and strong technical controls support normal interaction, including account login and standard use.

Infrastructure Integrity

The site is protected by Akamai CDN/WAF infrastructure, with observed edge servers and potential origin candidates. This protective layer reduces direct exposure of the service infrastructure and is a mitigating security factor, although CDN/WAF protection alone does not establish legitimacy.

Closing Assessment

Normal account access and standard use are appropriate; higher-value financial decisions should remain subject to ordinary institutional controls and confirmation of the applicable lending terms.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about easycredit.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
