

Is easystore.co legit? TrustSniffer's high-trust assessment: 100/100

easystore.co

Verdict

100

OUT OF 100

HIGH TRUST

easystore.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-06 by automated analysis. Classification confidence 65%.

What this site appears to be

Marketing/product landing page for EasyStore's Unified Customer Experience offering. Describes features (commerce, retail, marketing, loyalty), use cases, merchant stories, and CTAs such as Try for Free and Contact Sales. No evidence of credential harvesting or financial investment schemes.

Evidence status and limitations

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

EasyStore is an established ecommerce software platform presenting a unified customer-experience offering for merchants, combining online storefronts, retail point of sale, marketing, loyalty, payment gateways, order fulfilment, integrations, merchant stories, and enterprise engagement through “Try for Free” and “Contact Sales” pathways.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent SaaS business model rather than an investment, cryptocurrency, or financial-return scheme; its captured product page contains no phishing indicators, credential-harvesting elements, suspicious forms, or brand-impersonation signals. Historical continuity and clean external reputation evidence support the conclusion that the website is an established business property rather than a newly repurposed impersonation site.

EVIDENCE

- Domain registration record: created 2015-11-22; age 10.72 years.
- Web archive: 477 snapshots spanning 2013–2018, with 6 years tracked.
- Homepage product analysis identifies a legitimate ecommerce SaaS offering, with no red flags and no evidence of credential harvesting or financial investment schemes.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit.

Regulatory Verification Notes

The website's commercial identity is consistent with EasyStore Commerce Sdn Bhd, and the offering is presented as subscription-based ecommerce software rather than a regulated financial product. The available marketing content does not state a financial-services license or registration number; this is a limited disclosure point for regulatory scoping, not evidence of deception. A separate broker-reputation comparison produced no match, which is supportive contextual information but is not a licensing determination.

EVIDENCE

- The homepage identifies the business model through storefront, point-of-sale, marketing, loyalty, payment, fulfilment, and integration features.
- The domain registrar is Gandi SAS, and the registrant organization is EasyStore Commerce Sdn Bhd.
- The site's TLS certificate is OV, issued by Sectigo Public Server Authentication CA OV R36 to EasyStore Commerce Sdn Bhd, valid through 2026-09-17.
- Hosting telemetry records AS16509, Amazon.com, Inc., US.

What to Verify Next

Before a formal enterprise deployment, procurement should confirm the applicable contracting entity, service terms, data-processing commitments, support obligations, pricing, renewal, and cancellation provisions through the site's commercial and support channels. Where the merchant's jurisdiction requires specific payment, consumer-protection, or data-protection arrangements, those requirements should be mapped to the services actually being purchased. Independent confirmation of official contact channels is appropriate for high-value procurement or administrative changes.

EVIDENCE

- The homepage provides "Pricing," "Help & Support," "Merchant Stories," "Log In," "Contact Sales," and "Try for Free" pathways suitable for contractual and operational review.
- The product navigation identifies payment gateways, order fulfilment, loyalty, customer communications, and marketplace integrations as service areas requiring scope confirmation.
- The site presents enterprise engagement through Contact Sales, providing a route for obtaining formal commercial and compliance documentation.

Summary Verdict

EasyStore presents a legitimate, established, and trustworthy website with a coherent business purpose, consistent identity, clean reputation, and no observed scam or impersonation contradiction. Normal interaction, including account login and standard account actions, is appropriate.

Infrastructure Integrity

The site uses mainstream CDN-backed Amazon delivery infrastructure, which provides a conventional and resilient hosting posture and reduces the significance of direct-server exposure as a practical concern. This infrastructure is a mitigating technical signal, not independent proof of organizational legitimacy.

Closing Assessment

Standard use is appropriate, with procurement and deployment decisions guided by the organization's normal contractual, privacy, and jurisdiction-specific due-diligence process.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of easystore.co.

- The request stayed on easystore.co. It was not redirected to another domain. CLEAR
- Registration is published under Gandi SAS. CLEAR
- DNS for this domain is served by awsdns-02.net, across 4 name servers. NOTED
- The registration is paid up to 2026-11-21. NOTED
- The earliest public archive of this site is from 2013-05-25. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about easystore.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
