Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

EasyTrader is a Persian-language online investment platform presented as Mofid Brokerage’s system for executing securities transactions, managing investment assets, and accessing related brokerage services in Iran.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or confirmed malicious reputation signals were observed. The domain has a sustained historical presence, substantial public traffic, and clean results across the evaluated external threat-reputation sources. These signals converge with the site’s mature, content-rich presentation and support the conclusion that it is an established service rather than a recently created imitation.

- The domain record indicates registration in 2019 (~6.6 years old) through IRNIC.
- The web archive contains 271 snapshots spanning 2019–2026 (8 years tracked), with no suspicious repurposing or semantic drift identified.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no safe-browsing threat finding, no abuse reports, and no signature matches.
- The domain holds a global traffic rank of 8,571, placing it within the top tier of observed websites by traffic.

Regulatory Verification Notes

The homepage describes a financially consequential service involving securities and options trading, ordinary, smart, and offline orders, investment funds, instant withdrawals, banking-card access, and automatic daily returns on idle brokerage balances. These functions may involve custody of, or operational access to, customer funds and securities. The supplied page content does not present an identifiable regulatory authority, licence number, or independently verifiable registration credential; this is a disclosure-verification matter, not evidence of fraud. No matching third-party broker record was available to add independent regulatory context.

- The homepage advertises online securities execution, portfolio-management tools, options trading, investment funds, and automatic investment of brokerage cash balances.
- The reviewed homepage attributes the platform to Mofid Brokerage but does not display a licence number or named supervisory authority.
- The site’s transport encryption uses a DV certificate issued by Certum Domain Validation CA SHA2, valid until 2026-09-05.

What to Verify Next

Institutional due diligence should confirm that the platform domain is formally controlled or endorsed by Mofid Brokerage, validate the operator’s current authorization directly with the applicable Iranian securities regulator, and reconcile the permitted scope of services with the functions advertised on the site. Material marketing claims should be substantiated through audited, regulatory, or independently published records, and official support channels should be confirmed through an independent corporate source.

- The homepage claims more than 10 million active users and more than 1 million orders per day.
- The homepage describes the service as drawing on 30 years of Mofid Brokerage experience.
- The homepage advertises continuous support and describes itself as the country’s most credible exchange-trading system and a market leader by order volume and transaction share.

Summary Verdict

The website presents a legitimate, established, and trustworthy online brokerage service. Its historical continuity, significant usage footprint, clean threat reputation, coherent identity, and technically sound delivery support normal interaction, including account login and standard use.

Infrastructure Integrity

The site is served from AS49099 by Tadbir Pardaz IT Group LTD in Iran. Resolution identified three likely origin addresses and no CDN or WAF edge layer, meaning the hosting topology is directly exposed rather than shielded by mainstream intermediary infrastructure; this conventional configuration does not constitute an identified threat or contradiction.

- The hosting infrastructure serves the site from AS49099 (tadbir-as — Tadbir Pardaz IT Group LTD, IR).
- DNS resolution identified 3 unique IP addresses, all classified as likely origin addresses, with 0 CDN edge addresses detected.

Closing Assessment

Prospective users may engage with the service normally while applying standard financial-account safeguards and completing ordinary institutional due diligence before committing material assets.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about easytrader.ir at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
