

Is eba.gov.tr legit? TrustSniffer's high-trust assessment: 80/100

eba.gov.tr

Verdict

80

OUT OF 100

HIGH TRUST

eba.gov.tr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking Turkish education portal (EBA) with lists of curricular resources, interactive activities, and links for students, teachers, and parents. Content focuses on learning modules across subjects and references the Ministry of Education.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

EBA is a Turkish education portal presenting curriculum-aligned learning resources, interactive exercises, multimedia lessons, and guidance for students, teachers, and parents. Its apparent purpose is to provide free, informational educational services operated or funded through public education authorities rather than to collect deposits, sell investments, or promote commercial financial products.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence. The homepage presents a coherent educational identity under the EBA name, with content such as mathematics, science, language, environmental studies, EBA TV, and user pathways for students, teachers, and parents. The site showed no phishing indicators, hidden sensitive forms, wallet activity, suspicious scripts, cloaking, or detected brand-impersonation pattern. The real-world operator identity remains independently unverified, so the legitimacy conclusion is evidence-consistent rather than conclusive, but the available signals support an apparently established, low-risk public education portal.

EVIDENCE

- The homepage identifies “EBA” and presents “TRT EBA TV,” curriculum materials, interactive exercises, and separate access paths for students, teachers, and parents.
- The site's transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid through 2027-03-13.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no phishing or malicious-site result.
- The site was registered on 2011-01-19 and is approximately 15.58 years old; historical records show 2,873 snapshots from 2011 through 2026, covering 16 tracked years.

Regulatory Verification Notes

The content is consistent with a government-oriented educational service and references the Ministry of Education, but the supplied evidence does not independently establish the real-world operator's legal identity. No financial or investment service is presented, and no licensing claim or license number is supplied; this is relevant only as a limited disclosure point if a user is assessing institutional affiliation, not as evidence of fraud. A separate broker-reputation dataset recorded no match, which is contextual support rather than a licensing or regulatory determination.

EVIDENCE

- The homepage is categorized as an educational/government portal and contains curriculum resources, assessment materials, multimedia lessons, and instructional guidance.
- The domain uses the sovereign `gov.tr` suffix, while the on-page identity is not independently verified against a real-world entity in the supplied evidence.
- Hosting resolves through AS9121, TTNNet - Turk Telekomunikasyon Anonim Sirketi, Türkiye.
- The TLS certificate is DV-validated, issued by Sectigo Public Server Authentication CA DV R36, and expires on 2027-03-13.

What to Verify Next

For any credential or account interaction, confirm that the domain is reached through an independently sourced official government or education-authority reference rather than through an unsolicited message or advertisement. Where institutional assurance is required, confirm the EBA affiliation and the relevant administrative contact through an independent government directory or offline channel. Standard payment-protection and merchant checks are not applicable to the free educational model described by the site, but should be applied if a separate page later requests payment or sensitive information.

EVIDENCE

- The homepage presents free educational materials and does not show a sensitive form or deposit-based service.
- Browser testing found no hidden forms, externally submitted password forms, wallet-connection activity, or clipboard-hijacking behavior.
- The site completed 2 successful behavioral runs, with 0 console errors and no detected cloaking.
- The site's observed homepage content and its stated educational purpose are aligned with one another.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradiction. The conclusion is strong for ordinary informational use, while the operator's real-world identity remains independently unverified and therefore does not constitute proven institutional identity.

Infrastructure Integrity

The site is served directly through AS9121, TTNNet - Turk Telekomunikasyon Anonim Sirketi, Türkiye, with no CDN or WAF identified and one resolved IP address. This is a conventional, attributable hosting arrangement that provides less edge-layer abstraction than a major CDN; infrastructure is therefore a supporting technical signal, not proof of legitimacy.

Closing Assessment

Ordinary educational browsing is proportionate to the available evidence; before submitting credentials or any payment information, independently confirm the official institutional relationship and use only contact and access channels obtained from trusted government sources.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of eba.gov.tr.

- The request stayed on eba.gov.tr. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 38.46. NOTED
- The registration is paid up to 2027-01-18. NOTED
- The earliest public archive of this site is from 2011-03-19. CLEAR
- It is hosted on TTNNet, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about eba.gov.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
