

Is ebzpharmacy.com legit? TrustSniffer's high-trust assessment: 100/100

ebzpharmacy.com

Verdict

100

OUT OF 100

HIGH TRUST

ebzpharmacy.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Ebenezer Pharmacy is a pharmacist-led local pharmacy offering prescription dispensing, free medication delivery, at-home immunizations, diabetes support, virtual consultations, and community-focused services for Saint Cloud, Kissimmee, and Orlando. Contact details and address are provided.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Ebenezer Pharmacy is a pharmacist-led community pharmacy website presenting prescription dispensing, prescription transfers and refills, free medication delivery, at-home immunizations, diabetes support, virtual consultations, and personalized care for residents of Saint Cloud, Kissimmee, and Orlando.

Scam/Impersonation Risk

No scam, phishing, impersonation, or other contradictory signals were observed. The homepage presents a coherent local-healthcare proposition, with identifiable pharmacy services, service locations, contact details, and an address rather than an investment, cryptocurrency, or other abuse-prone commercial model. The site also presented no login form, sensitive data-collection form, wallet connection, hidden form, suspicious script, or external submission behavior during technical interaction analysis. Available reputation evidence contains no blacklist or malicious-content finding, although external reputation coverage was not complete.

EVIDENCE

- The homepage identifies Ebenezer Pharmacy and describes pharmacist-led prescription, delivery, immunization, diabetes, and consultation services.
- The domain was registered on 2022-04-13 and is approximately 4.36 years old.
- Archive records contain 7 snapshots spanning 2023–2025, representing 3 years tracked.
- The homepage had no detected phishing or brand-impersonation indicators and no sensitive form activity.

Regulatory Verification Notes

The website's apparent business model is consistent with a local pharmacy, but the available material does not independently verify the real-world operator or establish a regulatory affiliation. No pharmacy license number or licensing authority is claimed in the supplied site evidence; this is a verification and disclosure matter, not evidence of deception. The published local service scope and contact information provide useful operational context, while the absence of an independently verified identity means the site should be treated as apparently legitimate rather than legally or operationally proven. No matching third-party broker-reputation record was identified.

EVIDENCE

- The homepage labels the business "Ebenezer Pharmacy," identifies Saint Cloud, Kissimmee, and Orlando service areas, and provides contact and address details.
- Domain registration is through GoDaddy.com, LLC, with an expiration date of 2027-04-13.
- The site is served from AS16509, Amazon.com, Inc.; the TLS certificate is issued by YR1 at DV validation level and is valid to 2026-11-02.

What to Verify Next

Before credential or payment interactions, independently confirm that the operating pharmacy and its responsible pharmacist appear in the applicable state pharmacy licensing registry. Confirm the business identity, prescription-transfer process, delivery terms, refund or return policy, and payment-protection arrangements through contact details obtained independently of the website. For any healthcare transaction, verify that the requested service is appropriate and that prescription handling follows the applicable clinical and legal requirements.

EVIDENCE

- The homepage provides a named pharmacy, service locations, telephone contact, and address that can be compared with independent business and licensing records.
- The service pages describe prescription dispensing, transfers, refills, delivery, immunizations, diabetes support, and consultations, creating specific claims for independent confirmation.
- The absence of sensitive forms and login functionality on the observed homepage means account and payment procedures should be confirmed through the site's stated business channels before use.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No contradictions were observed. The real-world operator identity remains independently unverified, so the evidence supports apparent legitimacy rather than proof of ownership or regulatory status.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than identified origin candidates. This protection reduces direct origin exposure and is a mitigating infrastructure signal, but it does not independently establish the operator’s identity.

Closing Assessment

Normal browsing is proportionate to the assessed posture; ordinary independent merchant-identity, policy, and payment-protection checks should be completed before credentials or payment details are submitted.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ebzpharmacy.com.

- The request stayed on ebzpharmacy.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-13. NOTED
- The earliest public archive of this site is from 2023-03-16. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ebzpharmacy.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
