Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

echargejo.com is a parked-domain landing page presenting referral links for web hosting, AI-assisted website building, VPS hosting, domain alternatives, and business email services; its apparent purpose is to monetize domain parking through service referrals or domain resale rather than operate a substantive independent business.

Scam/Impersonation Risk

Sensitive interaction risk is critical. The site itself is a low-functionality parking page with no observed login, payment, or sensitive-data form, and no brand impersonation or conflicting legal identity was identified.

However, this benign page presentation does not offset the confirmed blacklist status and multiple malicious security detections associated with the domain. Abuse reports tied to the hosting IP are attributed to shared provider infrastructure, but the domain-level security detections remain a direct and material contradiction. The site should not be used for credentials, account access, financial activity, or downloads.

EVIDENCE

- External security telemetry records a confirmed blacklist designation and multiple malicious detections for the domain.
- Historical telemetry records 13 archive snapshots across 2021, 2022, 2024, and 2025, spanning 5 tracked years.
- The registration record shows creation on 2024-07-20 and an age of 2.08 years; continuity analysis separately records a domain age of 4.895277207392197 years.

Regulatory Verification Notes

The homepage identifies a parked domain and promotes Hostinger services, but it does not establish an independent operating entity, regulated business purpose, license, registration number, or responsible legal operator. Identity verification therefore remains incomplete, and the site's ownership and governance disclosures are opaque. No broker or regulatory match was identified in the supplied third-party context; that absence is contextual only and does not constitute licensing approval. The available TLS certificate confirms encrypted transport, not operator legitimacy.

EVIDENCE

- The homepage title and visible text identify the site as a "Parked Domain name on Hostinger DNS system."
- The domain registrar is HOSTINGER operations, UAB.
- The TLS certificate is DV-validated, issued by YE1, and valid to 2026-09-26T07:49:29+00:00.
- The homepage contains no stated license authority or license number.

What to Verify Next

Before any sensitive interaction, an institution should independently establish that the domain is intentionally controlled by the claimed or expected operator through an offline or otherwise trusted channel. Any purported regulated activity should be checked against the relevant official licensing registry, and payment or credential use should remain suspended unless the domain's authorization and business purpose are confirmed. Official support and contact channels should be confirmed independently rather than relying solely on the landing page.

EVIDENCE

- The observed page has no login form, hidden sensitive form, or payment transaction flow.
- Behavioral testing recorded 2 successful runs, 50 external XHR requests, and 11 external POST requests; no non-whitelisted external destinations were observed.
- The page is marked as a parked domain offered for sale, indicating that its current content may not represent a stable operating service.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The available evidence does not independently verify the operator's identity, while the external threat findings create a decisive trust contradiction despite the site's limited and apparently informational presentation.

Infrastructure Integrity

The domain resolves directly to Hostinger International Limited infrastructure in Cyprus, served through AS47583, with one directly resolved address and no detected CDN edge layer. Hostinger is a mainstream hosting provider and the transport layer is encrypted, but shared hosting infrastructure and valid TLS are mitigating technical characteristics only; neither establishes that this domain is legitimate or safe for sensitive use.

EVIDENCE

- Hosted on AS47583 (AS-HOSTINGER - Hostinger International Limited, CY).
- The infrastructure summary reports 1 unique IP, 0 CDN edge IPs, and 1 likely origin IP.
- The hosting registry is RIPE NCC and the hosting country is CY.

Closing Assessment

Sensitive use should be withheld, and any engagement should proceed only after independent confirmation of domain control, business purpose, and authorization through trusted channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 28 reports on hosting IP 2.57.91.91 (Hostinger International Limited, Content Delivery Network), 34% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about echargejo.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
