

Is ecoblog.it legit? TrustSniffer's high-trust assessment: 99/100

ecoblog.it

Verdict

99

OUT OF 100

HIGH TRUST

ecoblog.it appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 55%.

What this site appears to be

Italian environmental blog (Ecoblog.it) with editorial articles on energy, sustainability, recycling, mobility, DIY and related topics. Cookie/consent manager and advertising partners are present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Ecoblog.it is an Italian environmental and sustainability editorial blog presenting news, practical advice, and feature content on energy conservation, sustainable mobility, recycling, home, gardening, do-it-yourself projects, food, and wellbeing; its apparent business model is advertising-supported publishing with consent management and advertising partners.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, blacklist, or malicious-content indicators. The homepage presents coherent editorial content rather than a deceptive transactional or credential-collection interface, and no login or sensitive form was detected. Automated behavior included external advertising-related requests, page mutations, and console errors, but no hidden forms, password submissions, wallet activity, clipboard manipulation, or cloaking; in context, these signals are compatible with advertising and consent functionality rather than an abuse pattern.

EVIDENCE

- The homepage is classified as “Content / News / Blog” and contains articles attributed to named authors across environmental and household topics.
- The page analysis recorded no login form, hidden sensitive form, password-external form, wallet activity, clipboard hijacking, or brand-impersonation indicator.
- Domain registration records show registration in 2004, approximately 21.77 years old.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate editorial website, although the real-world operator identity is not independently verified. The site does not present itself as a regulated financial or investment service, and no licensing claim or registration number was identified in the available content; this is a disclosure point for ordinary due diligence, not evidence of a scam. The absence of a matching third-party broker record and the clean external reputation context provide additional reputational support, while not constituting a legal or regulatory determination.

EVIDENCE

- The registration record lists Algorithmmedia S.r.l. as registrar and T-Mediahouse S.r.l. as the registrant organization.
- The site is served from AS16276, OVH - OVH SAS, FR.
- The transport certificate is issued by YE1, uses Domain Validation (DV), and is valid to 2026-09-28.
- The domain appears in the global top-million traffic ranking, with a recorded rank of 43337.

What to Verify Next

Before any credential or payment interaction, independently confirm that the relevant privacy, advertising, editorial, and contact disclosures correspond to the intended Ecoblog publication and that any third-party offer reached through advertising is operated by the named merchant. Where a regulated product or service is promoted through the site, confirm the provider and license directly with the applicable official registry rather than relying on site content. Confirm official support and contact channels through an independent route.

EVIDENCE

- The homepage identifies an editorial purpose centered on environment, energy, sustainability, and practical consumer advice.
- The available page content contains advertising and consent-management components, making separation between editorial material and third-party promotions an appropriate verification step.
- The site uses WordPress and presents a substantial article-led content structure rather than an account- or transaction-led interface.

Summary Verdict

The overall posture is high trust and low risk, with strong convergence between the site's established editorial presentation, clean reputation signals, long-standing registration, and sound technical operation. The website should be regarded as apparently legitimate and suitable for ordinary browsing, while its operator identity remains not independently verified.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer between visitors and the underlying service, and the observed network path resolved through a CDN edge rather than exposing a directly observable origin. The infrastructure posture is therefore consistent with standard web-service protection, but it is not, by itself, proof of legitimacy.

EVIDENCE

- Cloudflare CDN/WAF protection was detected.
- One CDN edge address was observed, with no origin candidate identified in the analysis.

Closing Assessment

Routine browsing is proportionate to the assessed posture; credential or payment activity should follow ordinary independent checks of the relevant counterparty, privacy terms, return or service conditions, and payment

protections.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ecoblog.it.

- The request stayed on ecoblog.it. It was not redirected to another domain. CLEAR
- Registration is published under Algorithmmedia S.r.l.. CLEAR
- DNS for this domain is served by cloudflare.com. NOTED
- The registration is paid up to 2026-11-30. NOTED
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ecoblog.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
