Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established Philippine ecommerce storefront selling gaming consoles, video games, computers, peripherals, consumer electronics, collectibles, and digital products at displayed Philippine-peso prices, supported by preorders, promotions, delivery services, and loyalty rewards.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other contradictory signals were observed. The login, registration, password-recovery, and newsletter forms are consistent with an ordinary retail account environment: no hidden forms, untrusted submission destinations, credential transfers to external forms, cloaking, clipboard manipulation, or suspicious scripts were detected. External reputation checks were also clean, supporting the conclusion that the storefront is legitimate rather than an imitation or credential-harvesting operation.

- The homepage presents coherent product categories, prices, cart actions, promotions, and retail account functions without deceptive or coercive claims.
- Interactive testing completed 2 of 2 runs successfully, with 0 external XHR requests, 0 external form posts, 0 hidden forms, and 0 suspicious inline scripts.
- External threat screening recorded 0 malicious and 0 suspicious detections, with no phishing, impersonation, or external threat-list finding.
- Domain provenance indicates registration in 2020 and an age of approximately 6.28 years; 379 archive snapshots span 2020–2026, representing 7 years of tracked history without detected repurposing or semantic drift.

Regulatory Verification Notes

The reviewed homepage identifies a conventional consumer-retail business model rather than a regulated financial, investment, brokerage, or crypto service. It does not present a licensing claim requiring validation, and no conflicting legal-entity names were identified. The available page evidence does not conclusively establish the content of separate corporate-identity or legal-disclosure pages; this is a limited documentation note, not an adverse legitimacy finding.

- The homepage describes direct retail sales of physical and digital gaming and electronics merchandise, with no financial-service or investment proposition.
- The reviewed content contains no claimed regulatory authority, licence number, or broker status.

- Third-party broker-context data produced no matching broker profile or associated reputational warning.
- The site is served from AS13335 (Cloudflare, Inc.); its transport encryption uses a valid DV certificate issued by YE1, valid until 2026-10-28.

What to Verify Next

For procurement, material purchases, or vendor onboarding, the contracting entity, returns and warranty terms, delivery conditions, and accepted payment protections should be confirmed from the relevant checkout and policy pages. Official customer-service channels should also be independently confirmed before initiating a dispute, return, or account-recovery process.

- The homepage provides order-status functionality, making fulfillment and delivery conditions relevant to transaction review.
- Product listings include preorder and digital-store categories, for which cancellation, fulfillment, and refund rules may differ from ordinary stocked goods.
- Account registration and password recovery are available, making the published account-support process relevant to identity and access management.
- Cart-based purchasing and displayed local-currency prices establish a standard transactional retail relationship.

Summary Verdict

The website presents a legitimate, established, and trustworthy ecommerce operation. Its sustained provenance, coherent commercial content, clean reputation, and benign observed behavior converge strongly, with no contradictory evidence undermining its identity or intended purpose.

Infrastructure Integrity

The website uses Akamai and Cloudflare CDN/WAF infrastructure, with two observed addresses identified as edge servers and no exposed origin candidate. This architecture reduces direct origin exposure and provides a meaningful protective control, although infrastructure protection is supporting evidence rather than independent proof of legitimacy.

Closing Assessment

Normal browsing, account login, account management, and standard purchases are appropriate, subject to routine review of transaction and fulfillment terms for material orders.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ecommerce.datablitz.com.ph.

- The request stayed on ecommerce.datablitz.com.ph. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2020-04-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ecommerce.datablitz.com.ph at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
