Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Ecomputer is a Spanish corporate information-technology company whose website presents IT consulting, software and web development, technical support, cybersecurity, hosting, and computer products for business and consumer customers.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious detections were observed. The homepage presents a coherent corporate identity and ordinary business functions, while its forms are limited to search, callback requests, and newsletter subscriptions rather than credential collection or unusual payment workflows.

EVIDENCE

- The homepage identifies Ecomputer as an established IT company and presents consistent corporate branding.
- The homepage contains no detected phishing, impersonation, crypto, wallet-connection, or hidden-sensitive-form indicators.
- External reputation checks returned zero malicious and zero suspicious detections, with no confirmed phishing listing.

Regulatory Verification Notes

The website describes a conventional IT-services and ecommerce business rather than a regulated financial service. Its stated activities include managed IT, ERP and business software, web development, marketing, technical support, cybersecurity, backups, hosting, domains, and computer-product sales. Legal links, multiple offices, telephone channels, email addresses, and social profiles support an identifiable commercial presence; no regulated license or license number is claimed in the supplied material, which is a limited disclosure point rather than an indication of misconduct. No relevant broker-reputation match was identified.

EVIDENCE

- The homepage provides legal links, office information, telephone numbers, email channels, and social profiles.
- The homepage describes IT consulting, managed services, software and web development, cybersecurity, hosting, and computer sales.
- Served on AS12430 (VODAFONE_ES - VODAFONE ESPANA S.A.U., ES).
- TLS certificate issued by Sectigo Public Server Authentication CA OV R36, with OV validation, valid to 2026-12-28T23:59:59+00:00.

What to Verify Next

For formal procurement or regulated-sector engagement, confirm the applicable contracting entity and service terms in the linked legal documentation. Contact details should be independently confirmed through the company's published corporate channels before establishing a long-term commercial relationship.

EVIDENCE

- The homepage links to the site's legal documentation for entity and contractual review.
- The homepage supplies multiple offices and telephone channels suitable for independent contact verification.

Summary Verdict

The website presents a legitimate, established, and trustworthy corporate posture with no observed contradiction or material fraud signal. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The confirmed technical evidence shows stable service from an identified Spanish network and protection by a valid organization-validated TLS certificate. This supports transport integrity and network accountability, while infrastructure controls remain supporting rather than standalone proof of legitimacy.

Closing Assessment

Normal business engagement may proceed under routine organizational procurement, account-security, and transaction controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ecomputer.es.

- The request stayed on ecomputer.es. It was not redirected to another domain. CLEAR
- It is hosted on VODAFONE_ES, from a server in ES. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ecomputer.es at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
