

Is ecopowerfl.com a scam? TrustSniffer's high-risk assessment: 0/100

ecopowerfl.com

Verdict

0

OUT OF 100

CRITICAL RISK

ecopowerfl.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 75%.

What this site appears to be

Company site for Eco Power FL offering site development and underground utility services, with contact/quote form, certifications listed, and company information. Appears to be a local Florida construction/utility contractor.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://ecopowerfl.com/>

What ecopowerfl.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Eco Power FL presents itself as a Florida-based site-development and underground-utility contractor, offering project services, company information, safety and certification claims, and a contact/quote process for prospective construction customers.

Scam/Impersonation Risk

No conflicting legal identities or direct brand-impersonation indicators were observed in the reviewed site content. The homepage presents ordinary business-service material and a quote-oriented contact process rather than login or credential-harvesting functionality. However, this benign presentation is materially outweighed by confirmed external blacklist status and multiple malicious detections, including a tier-one security-vendor detection. The five abuse reports associated with the observed address concern shared provider infrastructure, are whitelisted, and carry zero confidence; they are therefore not treated as site-specific attribution, but they do not offset the independent malicious and blacklist findings. The site's real-world operator also remains unverified.

EVIDENCE

- External reputation telemetry records 9 malicious detections and 1 suspicious detection, with Fortinet identified among the flagged vendors; the domain is also recorded as present on an external blacklist.
- The homepage contains approximately 6,135 characters of service and company text, one contact/quote form, no login form, and no detected sensitive form.
- The domain registration record shows creation on 2020-04-30 and an age of 6.31 years.
- Historical records contain 337 snapshots from 2021-11-30 through 2026-06-09, covering 6 tracked years.

Regulatory Verification Notes

The About content states that Eco Power FL has operated in the public and private sectors since 2008 and describes the business as family-owned, while the site lists certifications. Those on-site claims establish the nature of the presented business but do not independently verify the legal operator. The reviewed material does not state a licensing authority or license number, creating a regulatory-disclosure gap that should be resolved before any contractual engagement. Registration through GoDaddy.com, LLC and valid transport encryption are administrative and technical indicators only; neither establishes licensing or operator identity.

EVIDENCE

- The About content claims work since 2008, describes residential and underground-utility projects, and refers to safety and certifications.
- The business pages do not provide a license authority or license number in the supplied content.
- The site is served on AS13335 by CLOUDFLARENET - Cloudflare, Inc., US.
- The transport certificate is issued by WE1, uses DV validation, and is valid to 2026-11-18.

What to Verify Next

Before a contract, payment, or disclosure of sensitive business information, the prospective counterparty should independently confirm the company's legal name, physical operating details, and applicable Florida contractor licensing status through authoritative records rather than relying solely on the website. The quotation and payment instructions should be validated through an independently sourced business channel, and any certifications cited on the site should be checked with the issuing bodies. The official support and contact channels should also be confirmed through an independent, offline route.

EVIDENCE

- The homepage's primary interaction is a contact/quote form rather than an authenticated customer portal.
- The About content supplies a company-history claim and certification references but no independently verified legal-entity linkage.
- The site's page analysis found no login form, hidden form, or external password-submission form.

Summary Verdict

The overall posture is critical trust risk, with sensitive interaction unsuitable on the available evidence. The site's professional service presentation does not overcome the externally confirmed reputation contradictions, and its operator cannot be independently connected to a verified real-world identity.

Infrastructure Integrity

Cloudflare CDN/WAF protection is a mitigating control that reduces direct exposure of the hosting environment, but it is not evidence of legitimacy. The observed address was a Cloudflare edge address, and the origin server was not visible in the analysis; this limits independent hosting verification and could permit rapid content changes behind the edge layer.

Closing Assessment

The site should be limited to non-sensitive, read-only review until the independent business, licensing, and transaction checks are satisfactorily completed; credentials, financial information, and other sensitive submissions should not be provided.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 5 reports on hosting IP 162.159.140.166 (Cloudflare, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [ecopowerfl.com](#).

- The request stayed on [ecopowerfl.com](#). It was not redirected to another domain. [CLEAR](#)
- Registration is published under [GoDaddy.com, LLC](#). [CLEAR](#)
- DNS for this domain is served by [domaincontrol.com](#), across 2 name servers. [NOTED](#)
- The registration is paid up to 2028-04-30. [CLEAR](#)
- The earliest public archive of this site is from 2021-11-30. [CLEAR](#)
- It is hosted on [CLOUDFLARENET](#), from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [ecopowerfl.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
