

Is ecpay.com.tw legit? TrustSniffer's high-trust assessment: 95/100

ecpay.com.tw

Verdict

95

OUT OF 100

HIGH TRUST

ecpay.com.tw appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-style corporate homepage for Taiwan-based ECPay/Green World FinTech, advertising merchant payment processing, card terminals, ecommerce, logistics, invoicing, recurring billing, donation-payment tools, developer integration, and customer support. The supplied content shows substantial service context and corporate-policy information without deceptive return promises, credential harvesting, or obvious phishing behavior.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

ECPay is an established Taiwanese payment-technology website serving merchants and organizations with payment acceptance and broader commerce-support services. It presents a corporate service portal for prospective customers, registered sellers, developers, and consumers, with an apparent revenue model based on transaction fees, service charges, equipment arrangements, and enterprise implementations.

Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or other scam indicators were observed. The corporate identity is consistent across domain registration and organization-validated certificate records, while the long domain history and sustained archival presence support continuity rather than opportunistic reuse. External threat-reputation checks were clean, and the homepage contained no sensitive form, concealed credential capture, deceptive return promise, cryptocurrency solicitation, or wallet interaction.

- The domain-registration record identifies 綠界科技股份有限公司 as owner and organization, with NET-CHINESE as registrar; registered 6 September 2001 (~24.91 years old) and currently recorded through 11 September 2030.
- The web archive contains 955 snapshots spanning 31 December 2002–2 July 2026 (25 years tracked), with no established evidence of suspicious repurposing or semantic category drift.
- The corporate homepage presented no sensitive or hidden form, external password form, wallet connection, clipboard hijacking, cloaking, or suspicious inline script.
- External reputation telemetry recorded 0 malicious and 0 suspicious classifications, no malicious safe-browsing finding, no reported abuse, and no signature match.

Regulatory Verification Notes

The homepage identifies the service as ECPay/Green World FinTech and describes payment gateways, card terminals, recurring billing, installment options, ecommerce storefronts, logistics, electronic invoicing, ticketing, donation collection, developer integration, and security-assessment services. These activities create material merchant, consumer-funds, privacy, and contractual obligations, but the analyzed content does not establish a claimed regulatory authorization or display a license number. This is a due-diligence matter rather than evidence of deception: the supplied identity records are coherent, no conflicting legal entity appears, and the transport certificate independently binds the service to Green World FinTech Service Co., Ltd. No matching broker-reputation record was identified, which provides no affirmative regulatory conclusion either way.

- The homepage title presents Green World Technology/ECPay as a third-party payment brand and provides extensive merchant, developer, consumer-support, policy, and operational content.
- The analyzed homepage did not display a license claim, licensing authority, or license number.
- The site's transport encryption uses an organization-validated certificate issued by DigiCert G5 TLS RSA4096 SHA384 2021 CA1 to Green World FinTech Service Co., Ltd, valid to 10 January 2027.
- The service is hosted on AS396982 (GOOGLE-CLOUD-PLATFORM — Google LLC, US).

What to Verify Next

Institutional onboarding should confirm the precise contracting entity and its current corporate status through the appropriate Taiwanese registry, then determine which regulatory or payment-industry authorizations apply to the intended service. Procurement review should also validate settlement terms, chargeback allocation, data-processing obligations, incident-notification commitments, service availability, and subcontractor dependencies. Official support channels should be independently confirmed before operational escalation procedures are approved.

- The homepage provides separate entry points for seller support, developer documentation, consumer assistance, manuals, and downloadable forms, supplying identifiable channels for operational corroboration.
- Published notices describe scheduled maintenance affecting named banks, card services, convenience-store collection, and data-centre operations, making resilience and dependency terms relevant to onboarding.
- The site advertises two-factor authentication for merchant order and logistics-query functions, providing a concrete control for account-security validation.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence among corporate identity, historical continuity, clean threat reputation, substantive service content, and organization-bound transport security. No contradictory evidence undermines its stated identity or ordinary business purpose. Normal interaction, including account login, account activity, and standard transactions, is appropriate.

Infrastructure Integrity

The site resolves to a single Google Cloud address assessed as a likely direct origin, with no separate CDN or WAF edge detected. Mainstream cloud hosting and valid encrypted transport provide sound operational foundations, although infrastructure quality is a mitigating security signal rather than independent proof of legitimacy.

Closing Assessment

Prospective users and institutions may engage normally, applying standard payment-provider onboarding, contractual review, and transaction-control procedures proportionate to the value and criticality of the intended relationship.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ecpay.com.tw.

- The request stayed on ecpay.com.tw. It was not redirected to another domain. CLEAR
- Registration is published under NET-CHINESE. CLEAR
- DNS for this domain is served by co.uk. NOTED
- The registration is paid up to 2030-09-11. CLEAR
- The earliest public archive of this site is from 2002-12-31. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ecpay.com.tw at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
