

Is edadeal.ru legit? TrustSniffer's high-trust assessment: 80/100

edadeal.ru

Verdict

80
OUT OF 100

HIGH TRUST

edadeal.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Regional Russian coupons and deals aggregator (Едадил) listing store promotions and coupons for Moscow; contains links to mobile apps, support contact and partner pages. Content oriented at consumer savings.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

edadeal.ru is a regional Russian consumer-savings website that presents store discounts, promotions, coupons, and cashback offers, primarily for Moscow, with supporting mobile-app, partner, help, and account-access functions; its apparent business model is affiliate referrals, advertising, and partnerships with participating retailers.

Scam/Impersonation Risk

No contradictions were observed. The Moscow offers page presents a coherent consumer-deals service with store categories, named retailers, coupons, cashback, and links to mobile applications and support resources; the content contains no identified phishing, brand-impersonation, credential-harvesting, or other fraud indicators. Transport and browser observations also found no hidden forms, external password submissions, wallet-drainer activity, clipboard manipulation, or cloaking. Although the site generated substantial external request activity, that signal is plausibly attributable to its analytics, advertising, partner, and application-link ecosystem and does not form an abuse pattern in the available evidence. The site therefore reads as an apparently legitimate, established consumer service, while its real-world operator identity remains independently unverified.

EVIDENCE

- The Moscow offers page is classified as a deals, coupons, and local-offers directory, with no red flags identified and no suspected brand impersonation.
- Domain registration records show registration in 2012, with an age of 14.04 years.
- Historical web records contain 960 snapshots spanning 2013–2026, covering 14 years with a maximum observed gap of 1 year.
- Browser telemetry recorded 667 external XHR requests and 653 non-whitelisted external XHR requests; it also recorded zero hidden forms, zero external password forms, zero wallet-connect runs, zero wallet-drainer runs, and zero cloaking detections.

Regulatory Verification Notes

The available pages describe ordinary retail-promotion and coupon activity rather than a service that presents itself as a regulated financial provider. The site exposes legal, partner, help, vacancies, and contact-related navigation, but the supplied content does not independently establish the legal operator or provide a verified registration or licensing basis. This is a transparency and merchant-identity verification point, not evidence of deception. The available external reputation context is clean, and no broker-reputational match was identified. A

valid organization-validated certificate and long-running hosting arrangement further support the conclusion that the service is technically established, without proving who legally operates it.

EVIDENCE

- Site navigation includes dedicated legal and partner pages alongside help and vacancies pages.
- The site is hosted on AS13238 208398 through YANDEX-93-158-134-0; the technical sensor identifies YANDEX - YANDEX LLC, RU.
- The site's TLS certificate is issued by GlobalSign RSA OV SSL CA 2018 at OV validation level and is valid to 2027-01-13.
- Major reputation checks recorded 0 malicious detections, 0 suspicious detections, and no external blacklist result.

What to Verify Next

Before credential or payment interactions, an independent source should be used to confirm the legal operator associated with the service, review the legal and partner disclosures, and establish which retailer or intermediary is responsible for any transaction. Applicable consumer terms, refund or return arrangements, and payment-protection options should be checked before completing a purchase, particularly where an offer redirects to a partner. Official support and contact channels should also be confirmed through an independently sourced route rather than relying solely on links presented on the site.

EVIDENCE

- The site provides a legal page and a partner page that can be reviewed for operator and commercial-relationship details.
- The homepage and Moscow offers content identify store promotions and cashback opportunities but do not, in the supplied evidence, independently verify the responsible legal entity.
- The site links to official mobile-application marketplaces, which provide an additional channel for comparing the service identity and publisher information.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradiction. The classification supports ordinary site use, but it does not independently prove the real-world identity of the operator.

Infrastructure Integrity

The site resolves directly to four likely origin addresses in Russia, with no CDN or WAF detected and no edge-IP layer identified. Direct Yandex hosting provides an identifiable infrastructure context, while the organization-validated GlobalSign certificate is a positive transport-integrity signal; neither hosting nor TLS independently establishes legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the available evidence; before submitting credentials or payment details, independent merchant-identity, transaction-protection, and return-policy checks should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of edadeal.ru.

- The request stayed on edadeal.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by ru., across 2 name servers. NOTED
- The registration is paid up to 2027-07-30. NOTED
- The earliest public archive of this site is from 2013-07-26. CLEAR
- It is hosted on YANDEX, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about edadeal.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
