

Is eden.com.mx a scam? TrustSniffer's high-risk assessment: 0/100

eden.com.mx

Verdict

0

OUT OF 100

CRITICAL RISK

eden.com.mx shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Spanish-language corporate site for a landscaping/irrigation/lighting company offering design, installation and maintenance services for commercial and development clients. Contains service descriptions, company values, team composition, gallery and social links.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://eden.com.mx/>

What eden.com.mx served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Spanish-language corporate service site for commercial irrigation, landscaping, landscape lighting, and maintenance projects. It presents project descriptions, company values, team information, gallery material, and social-media links, with an apparent business model based on consultations, project contracts, and ongoing service agreements for businesses and property developments.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional landscaping-services business and does not show login forms, payment mechanisms, cryptocurrency features, or obvious impersonation indicators. However, this benign presentation is outweighed by confirmed external reputation contradictions: the domain is blacklisted by external sources, and multiple threat-intelligence detections classify it as malicious or suspicious. The available evidence does not establish a conflicting legal identity or confirmed brand impersonation, but the external detections create a material risk for sensitive interaction, credential submission, and financial engagement.

EVIDENCE

- The homepage presents irrigation automation, landscaping design, lighting, and maintenance services for developments, hotels, commercial centers, sports facilities, and corporate clients.
- External reputation telemetry recorded 12 malicious detections and 1 suspicious detection; Fortinet and Sophos were among the flagged vendors.
- The homepage analysis found no login form, hidden form, password submission, wallet connection, or suspected brand-impersonation behavior.

Regulatory Verification Notes

The site's "Who We Are" content describes a coordinated team of architects, landscapers, and engineers and identifies Rain Bird, Hunter Irrigation, and FX Luminaire as brands used in projects. These statements support a coherent commercial presentation but do not independently verify the operating entity or establish regulatory standing. No license, registration number, or regulatory authority is claimed on the reviewed pages; for a landscaping contractor this may be a business-verification issue rather than evidence of wrongdoing. The registration record identifies an individual registrant and a named registrar, while the transport certificate provides encryption but only domain validation.

EVIDENCE

- The domain was registered on 2021-12-09 and is approximately 4.7 years old; the registrar is AKKY ONLINE SOLUTIONS, S.A. DE C.V., and the recorded registrant is Antonio Carmona Sanchez.
- Hosting telemetry identifies AS32244, Liquid Web, L.L.C., United States.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid until 2026-10-16.
- The "Who We Are" page describes the service team and business values but does not state a license number or regulatory registration.

What to Verify Next

Before any sensitive interaction, an organization should independently confirm that the operating business, its personnel, and its project references can be reached through independently sourced contact details rather than relying solely on the website. Where a contract, deposit, or regulated construction activity is involved, the relevant Mexican business, contractor, tax, and local permitting records should be checked directly, and payment arrangements should preserve normal dispute and recovery protections.

EVIDENCE

- The contact and consultation areas are intended for prospective project engagements rather than account access and contain no sensitive-data form.
- The site links to Facebook, Instagram, and LinkedIn profiles, providing channels that can be compared against independently sourced business information.
- The gallery and service pages make project and capability claims that can be validated through named client references, site visits, or independently obtained commercial records.

Summary Verdict

The overall posture is **critical trust risk**. Although the website presents a coherent, ordinary corporate-service proposition, confirmed external blacklist and malicious-detection signals are decisive contradictions that prevent the domain from being treated as suitable for sensitive interaction.

Infrastructure Integrity

The site is hosted directly on Liquid Web infrastructure, with two likely origin addresses and no detected CDN or WAF. Direct origin exposure does not itself establish malicious intent, but it provides limited protective mitigation and leaves the infrastructure posture materially different from a site operating behind a mainstream edge-protection service.

EVIDENCE

- Infrastructure resolution identified 2 unique IP addresses, including 2 likely origin addresses and 0 edge addresses.
- No CDN or WAF vendor was detected.
- The resolved hosting environment is in the United States and is associated with Liquid Web.

Closing Assessment

The appropriate operational posture is to restrict the domain to non-sensitive observation while independently validating the business and any proposed engagement through offline or authoritative channels; credentials, confidential information, and financial commitments should not be provided on the basis of the website alone.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100

Identity verification confidence	78%
----------------------------------	-----

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of eden.com.mx.

- The request stayed on eden.com.mx. It was not redirected to another domain. CLEAR
- Registration is published under AKKY ONLINE SOLUTIONS, S.A. DE C.V.. CLEAR
- DNS for this domain is served by dissenynethost7.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-09. NOTED
- The earliest public archive of this site is from 2001-07-25. CLEAR
- It is hosted on LIQUIDWEB, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about eden.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
