

Is edit1to1.com a scam? TrustSniffer's high-risk assessment: 5/100

edit1to1.com

Verdict

5

OUT OF 100

CRITICAL RISK

edit1to1.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Default WordPress sample page titled 'Sample Page' with a 'Hello world!' post; no sign-in, payments, or advanced features.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

edit1to1c

Blog

What edit1to1.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a minimally configured WordPress blog presenting a default “Sample Page,” a “Hello world!” post, and generic navigation for a blog, with no visible commercial workflow, account function, payment facility, or defined operating purpose.

Scam/Impersonation Risk

Confirmed external blacklist status and multiple malicious or suspicious reputation detections create a serious contradiction to the otherwise technically benign presentation. The captured page contains no sign-in form, payment flow, wallet connection, brand-impersonation content, or suspicious browser behavior, but this limited and generic surface does not offset the external threat findings. No specific phishing or impersonation mechanism was observed in the page content; the principal risk is the confirmed reputational threat signal associated with the domain. The site’s contact-channel integrity should also be treated cautiously because the published contact address `not provided` is not a usable contact signal and may represent a deliverability-breaking typo or possible typosquat.

EVIDENCE

- The external reputation assessment recorded 3 malicious detections and 2 suspicious detections, with the domain also present on an external blacklist.
- The homepage is titled "Sample Page" and contains a default "Hello world!" WordPress post rather than substantive business or identity information.
- Behavioral inspection recorded no login form, hidden form, wallet connection, wallet-drainer activity, clipboard hijacking, suspicious inline scripts, or cloaking.

Regulatory Verification Notes

The website's apparent identity remains unverified. Its captured content is a default WordPress installation with generic links such as About, FAQs, Authors, Events, Shop, Patterns, and Themes, but it does not present a clear legal entity, regulated activity, licensing authority, or license number. This is a disclosure and verification gap rather than independent proof of misconduct. The combination of a very recently registered domain, thin site content, low page authority, and confirmed external reputation findings materially weakens the basis for treating the site as an established operating entity.

EVIDENCE

- The domain was registered on 2025-09-04 and is approximately 0.96 years old; the registrar is DYNADOT LLC.
- The site is served through AS13335, CLOUDFLARENET (Cloudflare, Inc., US).
- The transport certificate is issued by WE1 using Domain Validation (DV), valid through 2026-09-25.
- The captured homepage contains no stated licensing authority, registration number, or regulated-entity disclosure.

What to Verify Next

Before any sensitive interaction, an independent registry check should establish whether a real legal entity is associated with the domain and whether any claimed activity requires authorization. Any support or ownership details should be confirmed through an independently sourced channel rather than relying solely on site-provided information. Until those checks produce corroborating results, activity should remain limited to passive inspection and no credentials, payments, or other sensitive data should be submitted.

EVIDENCE

- The homepage provides only default WordPress sample content and does not identify an operating company or regulated business.
- The site has no visible login, payment, or sensitive-data form in the captured page.
- The domain's registration record identifies DYNADOT LLC as registrar and gives a 2025-09-04 creation date, providing a concrete basis for independent registry verification.

Summary Verdict

The overall posture is critical, with sensitive interaction risk driven by confirmed external threat detections and an unverified operating identity. The benign, static WordPress presentation should not be interpreted as

evidence that the domain is suitable for trusted transactions or account activity.

Infrastructure Integrity

Cloudflare CDN/WAF protection is a mitigating infrastructure control, and all observed addresses were Cloudflare edge servers on AS13335; the origin server was not observable in this analysis. This reduces direct exposure of the origin but does not establish the legitimacy of the site or offset the external reputation risk.

Closing Assessment

Enterprise users should block or tightly restrict sensitive interaction with the domain unless independent identity, ownership, and applicable authorization checks produce reliable corroboration.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of edit1to1.com.

- The request stayed on edit1to1.com. It was not redirected to another domain.

CLEAR

- Registration is published under DYNADOT LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-04. NOTED
- The earliest public archive of this site is from 2011-01-29. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about edit1to1.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
