

Is educacao.mg.gov.br legit? TrustSniffer's high-trust assessment: 100/100

educacao.mg.gov.br

Verdict

100

OUT OF 100

HIGH TRUST

educacao.mg.gov.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 45%.

What this site appears to be

Official state education department site (Minas Gerais) with informational content, cookie consent, links to services and contact information. No evidence of financial solicitations or credential harvesting.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What educacao.mg.gov.br served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is the public-sector information and service portal of the Secretaria de Estado de Educação de Minas Gerais, presenting education-department information, public documents, citizen contact channels, service links, and cookie-consent controls rather than commercial offers or payment solicitations.

Scam/Impersonation Risk

No contradictions were observed. The available content is consistent with a government education portal: it contains informational material, public-service navigation, contact facilities, and no evidence of financial solicitation, credential harvesting, phishing, or brand impersonation. Behavioral testing also found no login form, sensitive form, hidden form, wallet connection, clipboard manipulation, or suspicious script activity. The government-domain suffix and long registration history further support continuity with an established public-service presence, although they do not independently prove the real-world operator's identity.

EVIDENCE

- Homepage: identifies the institution as the Secretaria de Estado de Educação de Minas Gerais and presents education, public-service, contact, and transparency content.
- Homepage and observed browser behavior: no login form, sensitive form, hidden form, wallet interaction, clipboard write, or suspicious inline script was detected.
- Domain registration record: registered 1995-07-27 (~31.08 years old); the domain uses the `gov.br` government namespace.
- External reputation checks: 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit were recorded.

Regulatory Verification Notes

The site's apparent public-sector purpose is supported by its institutional page title, government namespace, and content describing public education services. No financial or sector-specific license is claimed, and no license number is presented; for this non-commercial education portal, that is a regulatory disclosure matter rather than evidence of deception. The available evidence is consistent with an established, apparently legitimate website, while independent verification connecting the website to the real-world operating institution remains incomplete. The public reputation context is favorable, but it is reputational context rather than a legal or licensing determination.

EVIDENCE

- Homepage: title displayed as "Secretaria de Estado de Educação de Minas Gerais," with links to public information, documents, contact channels, and transparency resources.
- Site transport encryption: DV TLS certificate issued by Valid Certificadora RSA DV SSL CA 2, valid to 2026-11-13.
- Hosting infrastructure: served from AS10670, COMPANHIA DE TECNOLOGIA DA INFORMACAO ESTADO MG, BR.
- Observed traffic and reputation context: the domain is within the established global web-traffic population and received no recorded malicious or suspicious reputation findings.

What to Verify Next

Before any credential submission or payment-related interaction, independently confirm the institutional identity through an official state-government directory or an offline government contact route. For any service that unexpectedly introduces a commercial transaction, confirm the applicable terms, responsible entity, return or cancellation provisions where relevant, and payment protections through an independent source. Standard informational browsing and use of ordinary public-service functions are proportionate to the observed risk posture.

EVIDENCE

- Official institutional directory check: confirm that the education department’s independently published government records reference the same service domain.
- Independent contact-channel check: validate any sensitive request through a contact route obtained separately from the website.
- Transaction-specific check: if a payment or merchant-like process appears, verify the responsible entity and applicable consumer-protection terms before proceeding.

Summary Verdict

The overall posture is **high trust and low risk**, with evidence strongly consistent with an established, apparently legitimate government education website. The classification does not constitute independent proof of the real-world operator’s identity, so the site should be regarded as credible but not identity-verified in the strictest sense.

Infrastructure Integrity

No CDN or WAF characteristic is identified in the supplied infrastructure evidence; this is neutral rather than adverse. The observed infrastructure does not present an identified abuse-ready pattern, and the hosting attribution is consistent with the site’s apparent public-sector function.

Closing Assessment

Ordinary informational use is proportionate; independent institutional and consumer-protection checks should be completed before credentials or payments are involved.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of educacao.mg.gov.br.

- The request stayed on educacao.mg.gov.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by gov.br, across 5 name servers. NOTED
- It is hosted on AS10670, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about educacao.mg.gov.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
