

Is educationportal3.in legit? TrustSniffer's high-trust assessment: 100/100

educationportal3.in

Verdict

100

OUT OF 100

HIGH TRUST

educationportal3.in appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking Hindi-language state education portal with extensive administrative content (directories, notices, recruitment and transfer orders, scheme information). Contains login entry points for ERP/guest faculty but primarily informational.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What educationportal3.in served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This Hindi-language website presents itself as the Education Portal of the School Education Department of the Government of Madhya Pradesh. It provides public-sector education information and administrative services, including school, employee, and student directories; notices; recruitment and transfer information; scheme management; and access points for ERP and guest-faculty services. Its apparent purpose is informational and administrative rather than commercial, with no financial solicitation or transaction model apparent.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent government-education service model, and the available page and behavior evidence shows no detected phishing, brand impersonation, malicious scripting, credential-harvesting behavior, or financial solicitation. The presence of administrative login entry points creates a normal sensitivity for public-sector account users, but the observed forms and destinations did not exhibit suspicious handling. The domain and external reputation signals are consistent with an established, apparently legitimate website rather than an active scam or impersonation site.

EVIDENCE

- The homepage identifies the service as an education portal and provides substantial administrative content, including directories, notices, transfer orders, and scheme information; no red flags were recorded.
- The site was registered on 2024-01-18 and is approximately 2.58 years old.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit; the site has a global traffic rank of 10262.
- Behavioral testing recorded 0 external XHR/fetch requests, 0 hidden forms, 0 suspicious inline scripts, and 0 wallet-drainer runs across 2 successful runs.

Regulatory Verification Notes

The site's legal and informational material refers to the Madhya Pradesh School Education Department, its responsibilities, applicable acts and rules, right-to-information material, and departmental offices. That presentation is consistent with a public education portal, but the real-world operator and government affiliation are not independently verified by the available evidence. No licensing claim or license number was identified; for this type of public-service site, that is a disclosure point to clarify rather than evidence of wrongdoing. The registration record names SFA Technologies and GoDaddy.com, LLC, which provides an administrative registration signal but does not, by itself, prove the site's asserted government affiliation.

EVIDENCE

- The department-information pages describe the School Education Department, its responsibilities, acts and rules, right-to-information material, and office structure.
- Domain registration identifies SFA Technologies as the organization and GoDaddy.com, LLC as registrar; creation date is 2024-01-18 and expiry date is 2027-01-18.
- The site is hosted on AS8075, Microsoft Corporation, US.
- The transport certificate is valid, issued by YR2 at DV validation level, and expires on 2026-11-03.

What to Verify Next

Before credential submission, an organization should independently confirm that the portal and its ERP or guest-faculty access points are linked from an official Madhya Pradesh government channel or departmental directory. Any claimed departmental contact or service relationship should be confirmed through an independently sourced official telephone number or offline administrative route. Where a transaction, document submission, or account-recovery action is involved, ordinary checks of the responsible entity, applicable service terms, and available payment protections should be completed before proceeding.

EVIDENCE

- The homepage contains login entry points for ERP and guest-faculty services, making independent confirmation of the access route appropriate.
- The site provides departmental office directories and contact-information functions that can be compared with independently sourced government records.
- The site describes administrative schemes and services but does not present a licensing authority or license number.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate public-service website. The classification supports normal site use in principle, while the absence of independent operator verification means that the site's asserted real-world affiliation should not be treated as proven.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with the observed address associated with Microsoft Corporation and no origin candidate identified in the analysis. This protective architecture reduces direct exposure of the origin and is a mitigating security factor, but it is not independent proof of legitimacy.

EVIDENCE

- CDN/WAF protection was observed, with 1 edge IP and 0 likely origin IPs identified.
- The observed edge address was 20.197.41.218, associated with Microsoft Corporation infrastructure in the United States.

Closing Assessment

Ordinary use is proportionate to the current low-risk posture; before credential or payment interactions, independent confirmation of the responsible entity, official access route, and applicable user protections remains appropriate.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of educationportal3.in.

- The request stayed on educationportal3.in. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by azure-dns.com, across 4 name servers. NOTED
- The registration is paid up to 2027-01-18. NOTED
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about educationportal3.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
