

Is educob.com a scam? TrustSniffer's high-risk assessment: 17/100

educob.com

Verdict

17

OUT OF 100

CRITICAL RISK

educob.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Very small promotional landing page showing 'Launching Soon' and marketing copy for an AI site builder (50 free credits). No forms, no payment or account flows, minimal content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://educob.com/>

What educob.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2007.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

educob.com is a minimal “Launching Soon” landing page presenting an AI website builder called Airo AI Builder, with a claim of 50 free credits and an invitation to start for free; the visible site appears to be an early-stage promotional project rather than an operational commerce or account platform.

Scam/Impersonation Risk

Confirmed external contradictions materially outweigh the benign appearance of the landing page. The domain is blacklisted by multiple external reputation sources, with three malicious and one suspicious detections recorded, while no brand-impersonation or phishing indicator was identified in the supplied page analysis. A separate set of 13 abuse reports concerns a shared Amazon content-delivery IP rather than being uniquely attributable to this site, so that signal is contextual; however, it does not offset the confirmed blacklist status. The homepage’s limited content, “Launching Soon” presentation, and free-credit promotion do not themselves demonstrate fraud, but they provide too little operational substance to resolve the external threat findings.

EVIDENCE

- External reputation checks recorded 3 malicious detections, 1 suspicious detection, and a confirmed blacklist status for the domain.
- The shared CDN IP 76.223.105.230 was associated with 13 abuse reports; the attribution identifies Amazon.com, Inc. shared infrastructure as the subject.
- The homepage displays “Launching Soon,” promotes “50 free credits” for the Airo AI Builder, and provides a “Start for free” call to action without visible login, payment, or sensitive-data forms.
- Archive telemetry records the domain as first seen on 2007-05-07 and last seen on 2025-02-27, with 19 years tracked and 40 recorded snapshots.

Regulatory Verification Notes

The available page does not identify a legal entity, licensing authority, registration number, or other formal operator credentials. That is a regulatory and transparency verification gap, not by itself proof of a scam, but it is significant because the site’s independently verified operator identity remains unverified. The published copyright notice and generic “Contact Us” reference do not establish a responsible legal entity. The certificate and hosting arrangements provide technical operation evidence only and should not be treated as regulatory endorsement. No matching broker record was identified in the supplied third-party context.

EVIDENCE

- The homepage contains a generic “Contact Us” reference and a copyright notice but no stated legal entity, license, or registration number.
- The domain’s historical registration telemetry records 2007 as the registration year and an age of 19.288158795345655 years.
- The site is served from AS16509, Amazon.com, Inc. (AMAZON-02), United States.
- TLS uses the GoDaddy TLS Intermediate CA DV - R1v1 issuer with DV validation and is valid to 2026-10-22T23:45:54+00:00.

What to Verify Next

Before any account creation, credential submission, payment, or other sensitive interaction, an independent corporate-registry search should establish the operator behind the site and confirm that the stated AI-builder service is genuinely associated with that entity. Any future terms, privacy, refund, data-processing, or subscription disclosures should be reviewed for consistent entity details and enforceable contact information. The advertised free-credit offer should also be tested only through a controlled, non-sensitive process until the service and its data-handling practices are independently validated.

EVIDENCE

- The homepage is a coming-soon page with approximately 603 characters of visible text and no internal navigation to legal or policy pages.
- Behavioral testing recorded 14 external XHR requests, 11 non-whitelisted external XHR requests, and 2 non-whitelisted external POST requests.
- No login form, hidden form, password-external form, wallet connection, or payment flow was detected during the observed page interactions.

Summary Verdict

The overall posture is **critical trust risk**, with a confirmed external reputation contradiction and an unverified real-world operator identity. The site may be a genuine early-stage project, but the available evidence is insufficient to support sensitive interaction or business reliance.

Infrastructure Integrity

The site is protected by a CDN/WAF layer using Amazon edge infrastructure on AS16509; all observed addresses were edge servers and no origin candidate was identified. This reduces direct origin exposure and can mitigate infrastructure-level attack surface, but it is only a protective control and does not establish the legitimacy of the operator or resolve the reputation findings.

EVIDENCE

- Four observed edge addresses were associated with AS16509; likely origin-IP count was 0.
- Hosting infrastructure was identified as AMAZON-02 - Amazon.com, Inc., United States, with trusted CDN protection detected.

Closing Assessment

Pending independent operator and service validation, interaction should remain limited to passive viewing, with credentials, financial information, and account access withheld.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- The page exchanged network traffic with destinations TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

- The page made background requests to destinations TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 76.223.105.230 (Amazon.com, Inc., Content Delivery Network), 26% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of educob.com.

- The request stayed on educob.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2029-05-24. [CLEAR](#)
- The earliest public archive of this site is from 2007-05-07. [CLEAR](#)
- It is hosted on AMAZON-02, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about educob.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
