## Full analysis

### Overview

This Polish-language website presents information about democratic education and democratic schools, including explanatory material, events, and practical guidance for parents, educators, and individuals interested in establishing or operating such schools; its apparent purpose is non-commercial educational advocacy.

### Scam/Impersonation Risk

The site has a **material reputation contradiction**: external intelligence recorded a confirmed blacklist hit and two malicious classifications, with one additional suspicious classification. This conflicts with the benign character of the homepage, which contains educational content rather than financial solicitations, login mechanisms, or credential-collection forms. No identity contradiction, brand impersonation, or phishing indicator was observed in the supplied page findings; however, the external detections warrant a clearly cautionary posture for sensitive interactions. The domain itself is long-established, which supports continuity but does not neutralize the reputation signal.

#### EVIDENCE

- External reputation assessment: 2 malicious classifications, 1 suspicious classification, and a confirmed blacklist hit across 2 external sources.
- Homepage: informational educational content; no login form, hidden form, sensitive form, or financial request detected.
- Domain registration: 2012-03-27; age 14.41 years.

#### Regulatory Verification Notes

The available pages describe democratic education, named schools and educational organizations, conferences, and guidance for parents and educators. They do not establish an independently verified real-world operator, and no license, registration number, or regulatory authority is claimed; for an informational advocacy site this is a disclosure and verification gap rather than evidence of a scam by itself. The site's established registration, stable page behavior, known TLS issuer, and coherent non-commercial content are consistent with an operating informational website, but they do not prove the identity or legal status of its operator. No matching broker-reputation record was identified.

#### EVIDENCE

- Site navigation and homepage: sections titled "Idea," "The most well-known democratic schools," "Organizations supporting democratic education," "Events," and "Act."
- Registration record: registrar Aftermarket.pl Limited; creation date 2012-03-27T17:31:38Z; expiration date 2031-03-27T17:31:38Z.
- Hosting and transport telemetry: served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US); TLS certificate issued by WE1 (DV), valid to 2026-10-08.

#### What to Verify Next

Before any sensitive interaction, the operator should be independently connected to a real-world educational organization through an offline or independently sourced channel. Any donation, event payment, account creation, or request for personal information should be checked against an independently confirmed legal entity, payment recipient, privacy terms, and refund or cancellation process. The authenticity of the site's public contact and organizational channels should also be confirmed through an external source rather than relying solely on the website.

#### EVIDENCE

- Homepage: presents an advocacy and information model with no visible payment, account, or credential workflow.
- Content structure: provides guidance for parents, educators, and people seeking to start or manage democratic schools, making operator and organizational provenance relevant to any consequential engagement.
- Technical behavior: 2 successful observation runs; 0 external XHR requests, 0 non-whitelisted external posts, and 0 hidden forms detected.

Summary Verdict

The website has a moderate trust posture with elevated risk attached to sensitive interaction. Its content and technical presentation are consistent with a genuine informational education resource, but the unresolved external reputation contradiction and unverified operator identity prevent a positive trust determination for credentials, payments, or other consequential activity.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN and WAF, and all four observed addresses are CDN edge servers rather than identified origin infrastructure. This provides a meaningful defensive layer against direct exposure and abuse, but protective hosting infrastructure is a mitigating control, not evidence that the operator or content is legitimate.

Closing Assessment

Read-only access is the proportionate default; credentials, payments, and disclosure of sensitive personal information should remain withheld unless the operator and transaction arrangements have been independently validated.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about edukacjademokratyczna.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
