

Is edureka.co legit? TrustSniffer's high-trust assessment: 100/100

edureka.co

Verdict

100

OUT OF 100

HIGH TRUST

edureka.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-12 by automated analysis. Classification confidence 70%.

What this site appears to be

Edureka course catalog and marketing page listing instructor-led courses, PGPs, corporate training offerings, partner accreditations, reviews, and blog resources. Contact details, address and company footer information present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Edureka is an online education and professional upskilling platform offering instructor-led technology courses, postgraduate programs, certifications, corporate training, placement assistance, and related learning resources. Its apparent business model is fee-based education and training supported by course enrolments, corporate contracts, and institutional partnerships.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence. The homepage presents a coherent education-services business, with course catalogues, instructor-led programmes, contact details, reviews, corporate-training information, and links to legal pages rather than phishing or credential-harvesting content. The sign-in function is part of the stated account workflow, while technical testing found no hidden forms, password submissions to external destinations, wallet activity, cloaking, or suspected brand impersonation. External reputation checks were clean, and the site has an established domain and a visible global traffic footprint. The limited archival record does not establish a recent domain or a repurposing event; it simply provides limited historical coverage.

EVIDENCE

- The homepage identifies Edureka as an online courses, postgraduate-programmes, and corporate-training platform and records no page-level red flags.
- The domain registration record states creation on 2012-05-10 and an age of 14.26 years.
- The archival record contains 1 snapshot, dated 2024-06-03, with 1 year tracked.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist match; the domain is ranked 65046 and is within the top 1 million sites.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate education provider, but the real-world operator identity is not independently verified. The site presents contact information, an address, company footer details, terms, privacy information, course offerings, and claimed university or organisational partnerships, including accredited-programme references. It does not present a licensing authority or license number; for an education business this is primarily a disclosure and verification matter, while any accreditation or degree-related representation should be checked independently before payment. The domain uses Network Solutions,

LLC. as registrar, and the registration record's privacy service is an administrative characteristic rather than an identity contradiction.

EVIDENCE

- The homepage and footer provide contact, address, and company information, with navigation to the contact, privacy, and terms pages.
- The domain is registered through NETWORK SOLUTIONS, LLC.
- The site is served from AS16509, Amazon.com, Inc. in the US.
- The transport certificate is issued by Go Daddy Secure Certificate Authority - G2, uses DV validation, and is valid to 2027-02-28.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the operating merchant identity, the status of any claimed university or accreditation relationship, the applicable refund and cancellation terms, and the payment-protection arrangements. Contact details should be validated through an independent route rather than relying solely on information supplied during an enrolment process.

EVIDENCE

- The site exposes dedicated contact and terms pages that can be used to identify the relevant contractual and support information.
- The account workflow includes separate sign-up and login functions, making confirmation of the official account channel relevant before credential submission.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate website. The assessment supports ordinary website interaction, subject to the remaining uncertainty that the real-world operator identity has not been independently verified.

Infrastructure Integrity

The website is protected by Amazon CloudFront CDN/WAF infrastructure and resolves through Amazon-hosted edge addresses. This provides a meaningful mitigation against direct infrastructure exposure and common delivery-layer abuse, but protective hosting remains a security control rather than proof of the operator's identity or legitimacy.

EVIDENCE

- Observed edge addresses: 3.164.206.127, 3.164.206.36, 3.164.206.5, and 3.164.206.83.
- Infrastructure resolution identified 4 CDN edge addresses and 1 potential origin candidate.

Closing Assessment

Normal browsing and account use are proportionate to the assessment, while independent merchant-identity, accreditation, contractual, and payment-protection checks should be completed before committing credentials or funds.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of edureka.co.

- The request stayed on edureka.co. It was not redirected to another domain. CLEAR
- Registration is published under NETWORK SOLUTIONS, LLC.. CLEAR
- DNS for this domain is served by awsdns-53.com, across 4 name servers. NOTED
- The registration is paid up to 2028-05-09. CLEAR
- The earliest public archive of this site is from 2024-06-03. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about edureka.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
