Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the established Japanese EDWIN online fashion mall, presenting consumers with jeans, apparel, footwear, bags, and accessories from EDWIN, Lee, Wrangler, SOMETHING, Dickies, and related brands through a conventional retail model with yen-denominated pricing, promotions, account facilities, and shopping-cart functions.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other scam indicators were observed. The domain has a sustained operating history, substantial archival continuity, an established traffic footprint, and a clean reputation across the evaluated security sources. Interactive testing also found no cloaking, hidden forms, wallet-draining behavior, clipboard manipulation, or suspicious inline scripts.

- Domain-registration records show that edwin-mall.jp was registered in 2020 and is approximately 6.03 years old.
- The web archive contains 296 snapshots spanning 2020-11-05 to 2026-05-09, covering 7 tracked years without evidence of suspicious repurposing.
- External reputation telemetry recorded 0 malicious and 0 suspicious classifications, no malicious safe-browsing finding, 0 abuse reports, and a global traffic rank of 183,619.
- Behavioral examination of the homepage completed 2 of 2 runs successfully and detected no cloaking, hidden forms, external password forms, wallet activity, or clipboard hijacking.

Regulatory Verification Notes

The site operates as an ordinary consumer-fashion retailer rather than a financial or investment service, so the absence of a financial-services licence claim is consistent with its stated business model. The homepage provides access to corporate information, terms, privacy information, contact resources, and statutory ecommerce disclosures. Although the supplied material does not reproduce the detailed contents of every legal page, it presents the expected disclosure framework for an established Japanese online retailer; no conflicting legal-entity names or adverse broker-reputation match were identified.

- The homepage exposes dedicated terms, privacy, corporate-information, contact, and statutory-commerce resources.
- The site's transport encryption uses an organization-validated certificate issued by FujiSSL SHA2 Business Secure Site CA to E JEANING K.K., valid until 2026-09-25.

- The hosting infrastructure is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- The third-party broker-intelligence dataset produced no matching broker record or associated reputational warning.

What to Verify Next

Routine transaction controls remain appropriate: purchasers should confirm the displayed seller details and total price during checkout, retain the order confirmation, review the applicable delivery and return conditions, and use the contact details published within the site if post-purchase support is required. These are standard ecommerce safeguards rather than responses to an identified threat.

- The homepage presents transparent yen pricing and sale discounts, enabling comparison with the final checkout amount.
- The homepage provides returns and exchange messaging for purchasers to review before ordering.
- Store listings and customer-service resources provide channels for routine order and fulfilment enquiries.
- Customer reviews and product-ranking features offer additional on-site context for merchandise selection.

Summary Verdict

The website is legitimate, established, and trustworthy. Its coherent commercial identity, sustained operating history, mature retail content, clean external reputation, and authenticated transport security converge strongly in support of normal use, including account login and standard purchases.

Infrastructure Integrity

The identified hosting and encrypted-delivery posture uses mainstream infrastructure and provides a sound mitigating layer against routine transport and availability risks. These controls strengthen operational integrity but are not treated as standalone proof of business legitimacy.

Closing Assessment

Normal browsing, account use, and retail transactions are appropriate, subject to ordinary ecommerce practices such as checking the final order details and retaining purchase records.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of edwin-mall.jp.

- The request stayed on edwin-mall.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-48.net, across 4 name servers. NOTED
- The registration is paid up to 2026-07-31. NOTED
- The earliest public archive of this site is from 2020-11-05. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about edwin-mall.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
