Full analysis

Overview

The website is a direct-to-consumer farm e-commerce shop presenting farm-fresh eggs, heritage meats, seasonal produce, preserves, baked goods, personal-care products, and gift sets for pre-order and pickup at farmers markets in the Gainesville, Florida area.

Scam/Impersonation Risk

No contradictions were observed. The site's content is consistent with a small local farm business rather than a brand impersonation, phishing operation, or abuse-oriented service, and the available external checks recorded no malicious detections, phishing status, or blacklist hit. The apparent legitimacy is strong, although the real-world operator behind the site has not been independently verified; the site's self-description should therefore not be treated as proof of a legal entity's identity.

EVIDENCE

- The homepage presents a coherent farm-shop model centred on seasonal produce, eggs, meat, local farmers markets, and pre-orders.
- The site's internal navigation links to an Our Story page, product categories, Contact Us, account, cart, and checkout functions without detected brand-impersonation indicators.
- Available external checks recorded zero malicious detections, no malicious Safe Browsing status, and no external blacklist hit.
- The domain was registered through DNC Holdings, Inc. on 2018-08-01 and is approximately 8.06 years old.

Regulatory Verification Notes

The available content supports an apparently legitimate local retail operation, but it does not establish the operator's independent legal identity or demonstrate regulatory registration. No license or registration number is claimed in the supplied site analysis; for an ordinary farm retailer this may be unsurprising, but it remains a disclosure gap if the business is subject to local food, agricultural, or commerce requirements. The registration record uses privacy protection, which is an administrative characteristic rather than an identity contradiction. Transport security and mainstream hosting provide technical support for normal site operation but do not constitute legal or regulatory validation.

EVIDENCE

- The homepage and Our Story content describe a small family farm and identify market-pickup arrangements in the Gainesville, Florida area, without a stated license or registration number.
- The site is served from AS15169 (Google LLC / Google Cloud).
- The TLS certificate was issued by YR1 at DV validation level and is valid to 2026-10-18.
- The domain registration lists DNC Holdings, Inc. as registrar and an expiration date of 2027-08-01.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm the merchant's legal name, physical operating details, applicable local food or agricultural registrations, refund and fulfilment terms, and the payment provider's protection and dispute process. Contact channels should be confirmed through an independent route, and any market-pickup arrangement should be corroborated with the relevant market or farm location before placing a substantial order.

EVIDENCE

- The site provides an Our Story page and a Contact Us page that can be compared with independently obtained merchant details.
- The shop presents account and checkout functions, making payment-protection and refund-term review relevant before a transaction.
- The homepage identifies farmers-market pickup locations and pre-order fulfilment as the operating model.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk website. No scam, phishing, impersonation, or other contradictory signal was identified, while the principal residual uncertainty concerns independent confirmation of the real-world operator.

Infrastructure Integrity

The site resolves to a single Google Cloud-hosted address in the United States, with no CDN detected in the supplied infrastructure assessment. This is conventional hosting and offers a reasonable operational baseline, but hosting infrastructure alone is only a mitigating technical signal and does not prove legitimacy.

Closing Assessment

Normal browsing is proportionate to the evidence; account or payment use should follow ordinary independent checks of merchant identity, fulfilment terms, and payment protection.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about eggsotics.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
