Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a Turkish e-commerce shop presenting Calimera Toys educational wooden toys, children's products, promotions, product listings, shopping-cart and checkout functions, with revenue apparently derived from direct retail sales and related shipping charges.

Scam/Impersonation Risk

The site's visible content is consistent with an ordinary toy retailer and contains no stated investment, cryptocurrency, or other inherently abusive offering. However, external threat intelligence recorded a confirmed **blacklist** hit, including four malicious and one suspicious detections, and the authoritative assessment treats this as a material contradiction requiring a security-forward posture. No conflicting legal-entity names or explicit brand-impersonation indicators were identified in the supplied site content, but the external detections are sufficient to make login, credential submission, and payment activity unsuitable without independent validation.

EVIDENCE

- The homepage presents Calimera Toys product listings, discounts, Turkish-lira prices, cart controls, and checkout-oriented retail flows.
- External reputation telemetry recorded 4 malicious detections and 1 suspicious detection, including a Tier-1 threat detection; the domain was also recorded by external blacklist sources.
- Domain registration records show creation on 2012-09-28 and an age of 13.9 years.
- Web-archive telemetry records 88 snapshots spanning 2013–2026, with 14 years tracked.

Regulatory Verification Notes

The site provides links labelled for privacy and security, shipping and returns, an “About Us” section, and contact functionality, but the supplied evidence contains no claimed license, licensing authority, or license number. This is a regulatory-disclosure gap rather than independent proof of fraudulent conduct, but it prevents the site’s commercial operator or any regulated status from being independently confirmed. The available identity evidence remains unverified. A third-party broker-intelligence dataset returned no match, which provides limited contextual support but is not a licensing or regulatory determination.

EVIDENCE

- The site’s navigation includes “About Us,” privacy/security information, shipping and returns procedures, and contact functionality.
- No license claim, licensing authority, or license number is present in the supplied business-model and regulatory records.
- The domain is registered through Isimtescil Bilisim A.S.; the recorded registrant is “sertaç nurtan.”
- TLS uses issuer YR2 with DV validation and is valid to 2026-11-06.

What to Verify Next

Before any account creation, credential submission, or payment, an independent offline route should be used to confirm that the Calimera Toys business, its domain, and its published contact channels are genuinely connected. The operator’s legal identity, applicable commercial registration, consumer-rights obligations, delivery and returns process, and payment-protection arrangements should be checked against authoritative records and the issuing payment provider. Any existing credentials reused on the site should be changed from a trusted device, with account monitoring applied where relevant.

EVIDENCE

- The homepage contains account login and registration forms in addition to newsletter signup.
- The site offers cart and checkout functionality for physical goods, creating a direct payment-interaction surface.
- The navigation advertises shipping and return procedures, providing a specific basis for checking delivery, refund, and consumer-protection terms.
- Browser testing recorded two successful runs, no external XHR activity, no hidden forms, and no wallet-connection or clipboard-hijacking activity.

Summary Verdict

The website has a **critical trust posture** driven by confirmed external threat detections and blacklist status, despite its conventional retail presentation and established registration history. The real-world operator is not independently verified, so the site should not be treated as trustworthy for sensitive interactions.

Infrastructure Integrity

The site resolves directly to two likely origin addresses rather than a detected CDN edge, with no CDN or WAF identified. Hosting is provided by guzelhosting – GNET Internet Telekomunikasyon A.S. in Türkiye on AS42846, with the observed server address 104.247.162.99; this infrastructure is identifiable but does not mitigate the external reputation findings.

Closing Assessment

Sensitive interactions should remain suspended until the domain, operator, business registration, and payment arrangements have been independently validated through trusted channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
 - The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about egiticiahsapoyuncaklar.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
