

Is ehealthinsurance.com legit? TrustSniffer's high-trust assessment: 90/100

ehealthinsurance.com

Verdict

90

OUT OF 100

HIGH TRUST

ehealthinsurance.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-style eHealth landing page offering free comparison and enrollment assistance for Medicare, individual, family, employer, dental, vision, and short-term health plans. It identifies the operating licensed agency, provides agent telephone access, explains the comparison process, discloses carrier and government non-affiliation limitations, and links claims to reports and methodology.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established health-insurance marketplace and brokerage service that enables consumers and employers to compare Medicare, individual, family, dental, vision, short-term, and workplace health plans, obtain quotations, and complete enrollment online or with assistance from licensed insurance agents.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other scam indicators were observed. The site's long-established domain, substantial global traffic footprint, clean external threat reputation, consistent insurance-focused content, and benign interactive behavior strongly support its legitimacy. The quotation form requests location and plan-comparison information without presenting a sensitive credential form or transmitting data to an untrusted destination.

- The homepage consistently presents eHealth-branded insurance comparison and enrollment services and produced no page-content red flags or suspected brand impersonation.
- The domain was registered in 1998 and is approximately 28.18 years old; registration is maintained through CSC Corporate Domains, Inc. until 2030-05-31.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no abuse reports, and no signature matches.
- The domain holds global traffic rank 31,011, placing it within the established top one million websites.

Regulatory Verification Notes

The homepage identifies the service as a licensed insurance marketplace and agency, provides access to licensed agents, and explains carrier and government non-affiliation limitations. It also links relevant claims to reports and methodology, supporting transparent commercial presentation. The supplied page evidence does not contain a specific licensing authority or licence number; this is a minor disclosure-verification point rather than evidence of illegitimacy. No conflicting legal-entity names or adverse broker-reputation match were found.

- The homepage offers telephone access to licensed insurance agents and publishes operating hours, alongside online plan-comparison functionality.
- The homepage includes disclosures concerning participating carriers, governmental non-affiliation, commercial solicitation, and the limitations of available plan comparisons.

- The site's organization-validated TLS certificate identifies Ehealthinsurance Services, Inc.; it was issued by GeoTrust TLS RSA CA G1 and is valid until 2027-01-31.
- The site is served from AS16625 (AKAMAI-AS — Akamai Technologies, Inc., US).

What to Verify Next

For transactions requiring formal compliance assurance, the agency's current authority should be confirmed with the insurance regulator applicable to the consumer's state and the selected product. Plan availability, carrier participation, premiums, coverage exclusions, enrollment periods, and agent compensation should be checked against the final policy documentation. Official contact channels may also be confirmed independently before discussing personal health or financial information.

- The homepage directs Medicare users to compare plans by ZIP code and county, making jurisdiction-specific eligibility and availability material to the transaction.
- The homepage provides distinct account pathways for Medicare, individual or family, and small-business customers.
- The site links to Medicare.gov, providing an independent governmental reference point for Medicare-related information and comparisons.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence across identity, longevity, reputation, content quality, and observed behavior. No contradictory signals undermine the presented business identity, and the overall risk posture supports confidence in the service.

Infrastructure Integrity

The website uses Akamai's mainstream CDN/WAF infrastructure. Observed addresses include three delivery-edge systems and one potential origin candidate; this architecture reduces direct infrastructure exposure and provides a meaningful security mitigation, although protective hosting alone is not evidence of business legitimacy.

Closing Assessment

Normal interaction, including account login, plan comparison, enrollment activity, and standard account use, is appropriate, subject to ordinary review of policy terms and transaction details.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ehealthinsurance.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
