Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the official-facing online presence of Ekiti State University, presenting academic programmes, university administration, admissions information, research activity, student services, continuing education, transcript services, institutional facilities, and fundraising opportunities for a public-university audience.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive financial-return claims, or other fraud signals were observed. The consistent university identity, long-established domain, extensive historical continuity, and clean external reputation converge strongly in support of legitimacy rather than imitation or opportunistic domain use.

- The homepage consistently identifies Ekiti State University and contains substantial, institution-specific information spanning faculties, administrative directorates, campuses, research, and student affairs.
- The domain was registered on 2011-12-23 and is approximately 14.62 years old; Websoft Ltd is the registrar.
- The web archive contains 908 snapshots spanning 2012-01-24 to 2026-07-18, representing 15 years of tracked history without detected repurposing or substantive semantic drift.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, and 0 abuse reports; the domain also has an established top-one-million traffic footprint at rank 172,683.

Regulatory Verification Notes

The supplied homepage presents a coherent public-university identity within Nigeria's academic `edu.ng` namespace. It does not claim a financial-services or broker licence, and such licensing is not relevant to the stated educational business model. The academic namespace and institutional content support the site's positioning, although neither independently constitutes evidence of programme accreditation or statutory recognition by a particular education authority.

- The homepage title is "Ekiti State University – Home," and the page is consistently categorized as an education/public-university service.
- No licence authority, licence number, or regulated financial-service claim appears in the supplied homepage content.
- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 2026-09-20.

- The homepage presents a mature institutional model supported through tuition and service fees, public funding, grants, commercial enterprises, and donations.

What to Verify Next

For consequential admissions, transcript, donation, or fee-related actions, current instructions should be confirmed against the relevant institutional notice and through an independently established university administrative channel. Programme-specific accreditation or recognition should be checked directly with the applicable education or professional authority where that status is material.

- The homepage publishes admissions and screening notices, tuition and acceptance-fee information, and transcript and certificate services, making transaction-specific confirmation relevant.
- Official contact information is presented on the homepage and can support independent confirmation of time-sensitive instructions.
- The assessed homepage contained no sensitive form, hidden form, password form, or form submitting information to an untrusted destination.
- Two completed interaction runs detected no cloaking, clipboard hijacking, suspicious inline scripts, wallet-related activity, or hidden sensitive input collection.

Summary Verdict

The website is a legitimate, established, and trustworthy institutional presence with strong identity, provenance, content, and reputation alignment. No contradictory risk signals were identified. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare’s mainstream CDN/WAF infrastructure. All observed addresses were Cloudflare edge nodes, while the origin server remained shielded; this reduces direct infrastructure exposure but is treated as a security mitigation rather than independent proof of legitimacy.

- The site is served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US), with four observed CDN edge addresses and no exposed origin candidate.

Closing Assessment

Prospective users may engage with the site normally, applying routine institutional due diligence to consequential payments, applications, and official-record requests.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of eksu.edu.ng.

- The request stayed on eksu.edu.ng. It was not redirected to another domain. CLEAR
- Registration is published under Websoft Ltd. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-23. NOTED
- The earliest public archive of this site is from 2012-01-24. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about eksu.edu.ng at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
