

Is eldecofloor.com safe? TrustSniffer's low-trust assessment: 40/100

eldecofloor.com

Verdict

40

OUT OF 100

LOW TRUST

eldecofloor.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for Eldeco offering product information and an online store for flooring profiles and related products. Standard navigation, social links, catalog and contact pages visible.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://eldecofloor.com/

What eldecofloor.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Eldeco's website is a corporate product-catalogue and online-shop site for a manufacturer and seller of aluminium and stainless-steel flooring profiles, trims, skirting products, stair profiles, and related flooring accessories, with product information, catalogues, online-sales navigation, and contact channels for consumer and business orders.

Scam/Impersonation Risk

Contradictory reputation evidence materially changes the assessment. An external blacklist hit is present, and additional external detections recorded one malicious and two suspicious results. This is a confirmed reputational warning even though the homepage presents a conventional corporate/e-commerce model, contains no visible login form or sensitive data-entry form, and showed no direct page-level brand-impersonation indicators. The domain's established registration and sustained historical presence provide provenance context but do not neutralise the blacklist signal; sensitive interactions should therefore be treated as unsafe until the warning is independently resolved.

EVIDENCE

- External reputation telemetry records a confirmed blacklist hit for the domain, with 1 malicious and 2 suspicious detections among evaluated results.
- The homepage was captured successfully with HTTP status 200 and presents Eldeco product, catalogue, online-sales, and contact navigation rather than a login workflow.
- Domain registration telemetry records creation on 2014-12-24 and an age of 11.66 years; the registrar is Isimtescil Bilisim A.S.
- Historical records show 71 archive snapshots spanning 2015–2026, covering 12 tracked years.

Regulatory Verification Notes

The About, Corporate, Contact, Catalogue, and Online Sales pages describe a manufacturing and sales operation, but the available material does not independently verify the operating legal entity or establish regulatory standing. No licence authority or licence number is claimed in the supplied site evidence; for a conventional manufacturer and retailer this is primarily a disclosure and merchant-verification matter rather than proof of wrongdoing. The identity assessment remains qualified: the site links to Facebook, Instagram, X, and YouTube, which supports an apparent business presence, but does not by itself prove the real-world operator. The external blacklist warning should be handled as a reputational signal, not as a licensing determination.

EVIDENCE

- The About and Corporate pages provide company-oriented content, while the Contact and Online Sales pages expose business and purchasing pathways without an independently verified legal-entity record.
- The homepage links to Facebook, Instagram, X, and YouTube; the available identity evidence supports a likely connection to a real-world business but does not verify it conclusively.
- Hosting telemetry records AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid through 2026-11-06.

What to Verify Next

Before any purchase or submission of business information, an organisation should confirm Eldeco's legal name, address, invoicing entity, returns terms, and payment beneficiary through an independently sourced business register or established commercial directory. The blacklist result should be investigated with the relevant reputation provider and, where appropriate, the site operator should provide evidence of remediation. Contact details should be confirmed through an independent offline or separately sourced channel, and any transaction should use payment protections that support dispute or chargeback handling. Credential use is not justified by the site's stated product-sales purpose.

EVIDENCE

- The Contact page is the appropriate source for reconciling the published business details against an independent corporate or commercial record.
- The Online Sales page should be checked for the contracting seller, invoice issuer, returns process, delivery terms, and payment-protection arrangements before an order is placed.
- The About and Corporate pages should be compared with independently obtained company information rather than treated as conclusive identity evidence.

Summary Verdict

The website presents a plausible corporate-commerce purpose, but the confirmed external blacklist warning produces a low-trust posture and elevated risk for sensitive interaction. The available evidence is insufficient to support credentials, payment, or other consequential engagement.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than a directly exposed origin. This reduces direct exposure of the hosting environment and is a mitigating technical control only; it does not establish the legitimacy of the operator or override the reputational warning.

EVIDENCE

- Observed edge addresses were 104.21.18.92, 172.67.181.136, 2606:4700:3030::ac43:b588, and 2606:4700:3031::6815:125c.
- Four unique IP addresses were observed, with 4 CDN edges and 0 likely origin candidates.

Closing Assessment

Prospective users should restrict activity to passive review until the blacklist finding, merchant identity, and transaction protections have been independently resolved; credentials and financial transactions should not be used in the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of eldecofloor.com.

- The request stayed on eldecofloor.com. It was not redirected to another domain. CLEAR
- Registration is published under Isimtescil Bilisim A.S. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-12-24. CLEAR
- The earliest public archive of this site is from 2015-08-13. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about eldecofloor.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
