Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is El Diario Montañés, a regional Spanish news publication focused on Cantabria and Santander. It presents local and national news, sports, culture, opinion, economy, weather, and community coverage, funded through advertising, personalized advertising controls, and paid subscriptions.

Scam/Impersonation Risk

No contradictions were observed. The homepage has the characteristics of an established editorial news service rather than a phishing or impersonation page: it contains substantial, diverse news content, identifies its publication function, provides cookie and privacy controls, and shows no login form, hidden sensitive form, wallet activity, cloaking, or untrusted form destination. Browser interaction generated extensive third-party traffic and significant page changes, but these signals are consistent with advertising, analytics, personalization, and consent-management behavior; they were not accompanied by phishing, credential-capture, malware, or brand-impersonation indicators. External reputation checks returned no malicious or suspicious detections, and the domain appears within the top one million sites globally. Evidence:

- Homepage: regional news coverage across Cantabria, Santander, sports, culture, opinion, economy, weather, and community events, with no reported content red flags.
- Homepage interaction: no login form, hidden form, password-external form, wallet connection, wallet-drainer activity, clipboard hijacking, or cloaking was detected.

- Browser behavior: 171 external XHR requests, 124 non-whitelisted XHR requests, 33 external posts, and 12 non-whitelisted posts were observed; the maximum post-interaction DOM difference was 15,575.
- External reputation observations: 0 malicious detections, 0 suspicious detections, and a Tranco rank of 18611.

Regulatory Verification Notes

The homepage identifies the publication as El Diario Montañés and states that its content is produced by more than 1,000 journalists within Grupo Vocento. It links to an Aviso Legal and Política de Cookies, which supports ordinary publisher disclosure and privacy transparency, although the supplied evidence does not independently verify the real-world operator or establish a regulatory registration. No financial-service or other regulated-product claim is presented, and the available third-party broker context contains no match. The available evidence is therefore consistent with an apparently legitimate news publisher, while operator identity remains qualified rather than proven. Evidence:

- Homepage: states that El Diario Montañés content is produced by journalists belonging to Grupo Vocento and is financed through advertising and premium subscriptions.
- Homepage: provides direct references to the site's Aviso Legal and Política de Cookies.
- Homepage social links: Facebook, X, LinkedIn, and Instagram profiles are present; three social-presence signals were treated as corroborating identity context.
- Hosting and transport telemetry: served from AS54113, FASTLY - Fastly, Inc., US; TLS certificate issued by Certainly Intermediate R1 with DV validation, valid to 2026-09-05T03:51:51+00:00.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the legal notice identifies the contracting publisher, review the applicable subscription, cancellation, and refund terms, and ensure that payment processing provides appropriate consumer protection. Official contact and support channels should also be confirmed through an independent route rather than relying solely on page links.

Evidence:

- Homepage: subscription and cookie-consent controls are presented as distinct navigation choices, making the applicable subscription and consent terms relevant to review.
- Homepage: the legal and cookie-policy references provide the appropriate document locations for independent confirmation of publisher and data-use details.
- Homepage capture: no sensitive form or untrusted destination was observed, so any later credential or payment surface should be assessed separately at the point of use.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate regional news website. No scam, phishing, impersonation, or identity-contradiction signals were identified, but the operator connection remains independently unverified.

Infrastructure Integrity

The site is protected by Fastly CDN/WAF infrastructure, and the observed addresses were CDN edge servers rather than direct origin endpoints. This reduces direct exposure of the underlying service and is a useful mitigating control, but protective hosting infrastructure is not, by itself, proof of publisher identity or legitimacy.

Evidence:

- Infrastructure: Fastly CDN/WAF protection was identified for the website.
- Network resolution: 4 observed IP addresses were classified as CDN edge servers, with 0 likely origin IP candidates.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before submitting credentials or making a payment, independent checks of the contracting entity, subscription terms, cancellation rights, and payment protections should be completed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of eldiariomontanes.es.

- The request stayed on eldiariomontanes.es. It was not redirected to another domain. CLEAR
- It is hosted on FASTLY, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about eldiariomontanes.es at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
