Full analysis

Overview

Electroplanet is a Morocco-focused consumer e-commerce website presenting household appliances, electronics, accessories, product pricing in Moroccan dirhams, promotions, and shopping functions for online purchase with pickup or delivery.

Scam/Impersonation Risk

No contradictions were observed. The available evidence shows no phishing, impersonation, malicious-content, or blacklist indicators, and the site's retail presentation is consistent with an ordinary appliance and electronics store rather than an abuse-oriented service. Its long-running domain registration and sustained historical presence further support continuity of the website's apparent business purpose, although the real-world operator has not been independently verified.

EVIDENCE

- Domain registration records show creation on 2008-07-24 and an age of 18.06 years.
- Historical records contain 1,025 snapshots spanning 2011–2026, covering 16 tracked years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit.
- The homepage is classified as an e-commerce shop and contains no detected brand-impersonation or phishing indicators.

Regulatory Verification Notes

The site presents a conventional retail business model involving appliance and electronics sales, promotions, and delivery or collection services. The reviewed content does not state a licensing authority or license number; for this type of consumer retailer, that is a disclosure item to clarify rather than evidence of a scam. The available technical and reputational signals are consistent with an established site, while the available evidence does not independently prove the legal identity of the operator. Registration through WANA CORPORATE and valid domain transport encryption provide supporting administrative and technical context.

EVIDENCE

- The homepage title identifies Electroplanet as an appliance and multimedia specialist in Morocco, with product categories, prices, and discounts.
- Domain registration lists WANA CORPORATE as registrar.
- The site's TLS certificate is issued by WE1, uses Domain Validation (DV), and is valid to 2026-10-08.
- The site's page content contains standard search, cart, and account functions without a detected sensitive or externally directed form.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the merchant's legal identity, applicable commercial registration or licensing requirements, published returns and warranty terms, and available payment-protection mechanisms. The account and checkout experience should also be reviewed for consistency between the merchant name, payment recipient, order documentation, and official support channels.

EVIDENCE

- The homepage exposes account and cart functions, making credential and transaction-flow review relevant before use.
- The captured content presents product discounts and retail purchasing functions, so return, warranty, delivery, and payment terms should be checked independently.
- The available evidence does not independently connect the website to a verified real-world operator.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk website. The overall trust posture is high, with no observed scam or impersonation contradictions, but operator identity remains independently unverified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, which mitigates direct exposure of the origin environment and is a positive defensive signal, though protective hosting alone does not establish merchant legitimacy.

EVIDENCE

- Served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- Observed edge IP addresses were 104.18.26.55, 104.18.27.55, 2606:4700::6812:1a37, and 2606:4700::6812:1b37; 4 edge IPs and 0 likely origin IPs were observed.
- The site's hosting country is recorded as US and its registry as ARIN.

Closing Assessment

Normal browsing is proportionate to the assessment, while independent merchant-identity, terms, and payment-protection checks should precede credential submission or payment.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about electroplanet.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
