Full analysis

Overview

ELLE SHOP is a Japanese online fashion and lifestyle retailer presenting clothing, footwear, bags, accessories, jewelry, sportswear, children's goods, beauty products, home items, books, sales, rankings, editorial content, memberships, newsletters, and an official app for direct-to-consumer commerce.

Scam/Impersonation Risk

No contradictions were observed. The site's coherent retail model, substantial product and editorial content, absence of phishing or credential-harvesting indicators, and long-established domain support a legitimate identity rather than an impersonation or scam operation.

- The domain was registered in 2007 and is approximately 19.07 years old.
- The archive record contains 1 snapshot spanning 2009–2009, with 1 year tracked; this is limited archival coverage, not evidence of recent creation or repurposing.
- The homepage is classified as an established ecommerce site with no detected phishing, brand-impersonation, crypto, or hidden-form indicators.

Regulatory Verification Notes

ELLE SHOP presents a conventional retail-ecommerce business model rather than a regulated financial service. No licensing claim or license number is identified in the supplied page evidence; this is a minor disclosure point for ordinary consumer due diligence, not evidence of illegitimacy. External reputation signals are overwhelmingly benign, although one isolated suspicious classification warrants contextual rather than determinative treatment.

- The site is hosted on AS4694, IDCF - IDC Frontier Inc., JP.
- Its TLS certificate is issued by GlobalSign RSA OV SSL CA 2018, uses OV validation, and is valid through 2026-11-22.
- External checks recorded 0 malicious detections, 1 suspicious classification, and 0 abuse reports.
- The site appears within the top 1 million of global traffic rankings, at rank 155822.

What to Verify Next

For a prospective purchaser, confirm the applicable terms, returns process, payment protections, and customer-support route before completing a material order. Where institutional procurement or jurisdiction-specific consumer obligations apply, confirm the operating entity through the site's formal commerce documentation or an independent corporate registry.

- The homepage provides customer-support access, account registration, newsletter functions, and purchase-oriented navigation.
- The displayed catalog includes established fashion and lifestyle product categories, sales information, rankings, and brand content.
- The site’s stated business model is direct ecommerce supported by memberships, promotions, editorial content, and an official app.

Summary Verdict

The website presents a high-trust, established retail profile with strong convergence across its content quality, operational maturity, domain history, technical controls, and external reputation. No scam, phishing, impersonation, or identity contradiction was observed.

Infrastructure Integrity

The site resolves to IDC F - IDC Frontier Inc. infrastructure in Japan on AS4694, with no CDN detected and one resolved hosting address identified as the likely origin. This is a conventional, attributable hosting posture and provides a reasonable infrastructure signal, although hosting alone does not establish legitimacy.

Closing Assessment

Normal browsing, account login, purchasing, and standard site use are appropriate, subject to ordinary transaction and consumer-protection checks for the specific order.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about elleshop.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
