

Is elmundodelcampo.tv safe? TrustSniffer's moderate-trust assessment: 50/100

elmundodelcampo.tv

Verdict

50

OUT OF 100

MODERATE TRUST

elmundodelcampo.tv is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Regional Spanish-language TV channel website focused on agricultural content and videos. Encourages app downloads and social media follows; lists recent program episodes and links to external app card page.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What elmundodelcampo.tv served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

elmundodelcampo.tv presents a Spanish-language regional television and media service centered on agricultural programming, livestock topics, video episodes, scheduled broadcasts, application distribution, and social-media engagement. Its apparent business model is informational media supported by audience reach, content distribution, advertising, and related digital channels.

Scam/Impersonation Risk

The site has a clear media-oriented purpose and the reviewed homepage showed no login form, sensitive-input form, wallet connection, or apparent brand-impersonation mechanism. However, this benign page presentation is outweighed by confirmed external reputation contradictions: multiple threat detections were recorded and the domain appears on external blacklist sources. No conflicting legal identities or on-page impersonation indicators were identified, but the external detections create a material risk for sensitive interaction and prevent the site from being treated as trustworthy solely on the basis of its content.

EVIDENCE

- The homepage is categorized as a TV-channel/media page, with agricultural episodes, broadcast times, and social-media links; no phishing indicators or sensitive forms were observed.
- External reputation evaluation recorded 2 malicious detections and 1 suspicious detection, and an external blacklist hit was confirmed.
- Domain registration records show registration on 2016-12-04, with an age of 9.71 years; archival records span 2017–2026 with 63 snapshots across 10 tracked years.

Regulatory Verification Notes

The reviewed content identifies a media channel but does not present a licensing authority, license number, or clearly documented legal-entity disclosure. This is a regulatory-transparency gap rather than proof of fraud, but it limits independent confirmation of the operator and any broadcast or media authorizations. No matching third-party broker profile was identified, so that source provides no additional reputational context.

EVIDENCE

- The homepage describes the service as a television channel and promotes programming, applications, and social engagement without displaying a licensing authority or license number.
- The domain registrar is Wild West Domains, Inc.
- The site is served from AS47583, identified as AS-HOSTINGER — Hostinger International Limited, CY.
- Transport encryption uses a DV certificate issued by YE2, valid through 2026-11-17.

What to Verify Next

Before any non-public or consequential interaction, independently confirm the operating entity, the relevant media or broadcast authorization, and the official publisher of any application associated with the channel. Contact details and distribution channels should be validated through an independently sourced route rather than relying solely on links presented by the site. Any payment, credential, or account request should remain subject to documented identity and authorization checks.

EVIDENCE

- The homepage directs visitors toward application downloads and an external digital-card destination, creating a need to confirm the authenticity of the publisher and destination.
- The available site content contains no displayed license number or licensing authority to use as a basis for regulatory confirmation.
- The site has no login form or sensitive form in the reviewed page capture, so any later request for such information would represent a materially different interaction surface.

Summary Verdict

The overall posture is **moderate trust with elevated sensitive-interaction risk**. The website appears to function as an informational agricultural media channel, but confirmed external reputation contradictions materially reduce confidence in using it for credentials, account access, financial activity, or other sensitive transactions.

Infrastructure Integrity

The site resolves directly to infrastructure associated with Hostinger International Limited in Ukraine, with four likely origin addresses and no detected CDN edge layer. Valid TLS provides transport protection, but hosting and encryption controls are mitigating technical measures only and do not resolve the external reputation concern.

Closing Assessment

Passive viewing of publicly available media is the proportionate limited use case; account, credential, financial, or other sensitive interactions should be deferred unless the operator and relevant authorizations are independently confirmed.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of elmundodelcampo.tv.

- The request stayed on elmundodelcampo.tv. It was not redirected to another domain. CLEAR

- Registration is published under Wild West Domains, Inc.. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-04. NOTED
- The earliest public archive of this site is from 2017-05-10. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about elmundodelcampo.tv at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
