Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

El Parrillón de Pablo Profumo is a local restaurant website presenting Uruguayan-style grill cuisine, menu information, reservations, event and corporate dining options, contact details, and opening hours for its Miraflores location.

Scam/Impersonation Risk

No contradictions were observed. The homepage describes a conventional restaurant business with menu and reservation functions rather than financial, credential-harvesting, cryptocurrency, or other abuse-oriented activity. The site has no login form, hidden sensitive form, wallet interaction, or detected brand-impersonation signal. Six suspicious inline scripts were observed during technical behavior analysis, but they were not accompanied by sensitive-form activity, cloaking, wallet behavior, or non-whitelisted external submissions; this remains a minor technical observation rather than evidence of impersonation. Available reputation checks recorded no malicious or suspicious detections, and no broker-reputation match was identified.

EVIDENCE

- The homepage presents “El Parrillón de Pablo Profumo,” Uruguayan grill cuisine, menus, reservations, and local restaurant content, with no fraud indicators identified.
- The homepage’s only form is a reservation/contact form; technical testing identified no login form, hidden form, password submission, wallet activity, or clipboard manipulation.
- The domain’s archive contains 202 snapshots spanning 2002-09-27 to 2026-06-12, covering 25 years, with no suspicious repurposing or semantic drift detected.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate restaurant website, although the real-world operator identity is not independently verified. The site presents ordinary food-service and event-booking activities, so the evidence does not indicate a financial-service licensing requirement. No license or registration claim is made on the reviewed content; this is a limited disclosure point for ordinary merchant verification, not evidence of deception. The registration record uses private registration details, which is an administrative limitation rather than an identity contradiction. The site’s established registration continuity, valid transport encryption, and stable hosting support its technical maturity.

EVIDENCE

- The domain was registered in 2005 and is approximately 21.31 years old; the registrar is GoDaddy.com, LLC, with registration extending to 2027-05-04.
- The site is served from AS211126, WHG-MEX - WHG Hosting Services Ltd, GB.
- The site’s TLS certificate uses DV validation, is issued by YR1, and is valid to 2026-09-21T11:38:52+00:00.

What to Verify Next

Before credential or payment interactions associated with a reservation or event booking, ordinary independent checks should confirm the restaurant’s merchant identity, reservation and cancellation terms, and available payment protections. For higher-value corporate or event arrangements, confirmation through an independently sourced telephone or business channel is appropriate before funds are transferred.

EVIDENCE

- The homepage provides a physical Miraflores address, two telephone numbers, opening hours, and a reservation call to action that can support independent confirmation.
- The homepage distinguishes standard dining from corporate and holiday-event menus, making the applicable booking terms the relevant transaction detail to confirm.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence strongly consistent with an established, apparently legitimate website. No scam, phishing, impersonation, or identity-conflict indicators were observed, while the remaining uncertainty concerns only independent confirmation of the real-world operator.

Infrastructure Integrity

The site resolves directly to one identified hosting address on AS211126 operated by WHG-MEX - WHG Hosting Services Ltd in Great Britain, without a detected CDN or WAF edge layer. Its valid DV TLS certificate provides transport protection, but hosting and encryption should be treated as technical safeguards rather than proof of ownership or legitimacy.

Closing Assessment

Normal browsing and routine reservation activity are proportionate to the assessed posture; independent merchant-identity, booking-term, and payment-protection checks should be completed before credential or payment interactions.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of elparrillon.com.

- The request stayed on elparrillon.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by mysecurecloudhost.com, across 4 name servers. NOTED
- The registration is paid up to 2027-05-04. NOTED
- The earliest public archive of this site is from 2002-09-27. CLEAR
- It is hosted on WHG-MEX, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about elparrillon.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
