

Is elrneba.com a scam? TrustSniffer's high-risk assessment: 0/100

elrneba.com

Verdict

0

OUT OF 100

CRITICAL RISK

elrneba.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-24 by automated analysis. Classification confidence 55%.

What this site appears to be

Registrar/hosting parking page (Namecheap) indicating hosting account created and providing links to cPanel, WebMail, support and blog. No forms or solicitations present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	5 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	5 months old Most scam domains are under a year old	RISK
Web archive	Never archived No public history of this site	WATCH
Certificate	Encrypted connection Issued by SSL.com TLS Issuing RSA CA R1	NOTED

The page as captured

https://elrneba.com/

hosted by  namecheap

What elrneba.com served when TrustSniffer captured it on 2026-09-24. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a registrar-hosted parking page rather than an operational business site. It presents a Namecheap “Parking Page” stating that hosting was created and DNS configured, with links to cPanel, WebMail, support, news, and blog resources; its apparent purpose is to indicate that the domain is provisioned, not to offer a defined product or service.

Scam/Impersonation Risk

Confirmed external reputation contradictions make this a **critical-risk site for sensitive interaction**, despite the absence of malicious forms or solicitations on the captured page. The domain is blacklisted by external sources, with five malicious detections recorded and a tier-one threat detection attributed to Sophos. The available content does not establish a real operating business, and the site should not be treated as a trustworthy destination for login, credential submission, or financial activity. No distinct conflicting legal identities or confirmed brand impersonation were observed; the risk arises from the confirmed external detections and blacklist status.

EVIDENCE

- The homepage is identified as a Namecheap registrar/hosting parking page and contains no business solicitation, transaction flow, or sensitive form.
- External reputation assessment recorded 5 malicious detections from 10 effective detections and a tier-one threat detection attributed to Sophos.
- External blacklist status is confirmed by two evaluated reputation sources.

Regulatory Verification Notes

The captured site does not provide an operating-company identity, legal terms, licensing statement, registration number, or regulatory affiliation. This is a material verification gap because the page is only a hosting placeholder, while the independent connection between the domain and a real-world operator remains unverified. The domain was registered through Namecheap Inc.; that registrar relationship confirms infrastructure administration, not the identity or legitimacy of the site operator. A valid domain-validated certificate provides transport encryption only and does not establish regulatory standing.

EVIDENCE

- Domain registered on 2026-04-16 and recorded as approximately 0.44 years old.
- Registrar recorded as NAMECHEAD INC.
- TLS certificate is DV, issued by SSL.com TLS Issuing RSA CA R1, valid through 2027-03-29.
- The homepage contains no displayed license, registration number, legal-entity disclosure, or regulatory claim.

What to Verify Next

Before any sensitive interaction, an independent party should identify the intended operator through an authoritative corporate or regulatory registry and confirm that the domain is officially associated with that entity. Any support or account-management channel should be authenticated through an independently obtained contact route rather than relying solely on links presented by the parked page. Given the confirmed reputation contradictions, credentials, account access, and financial activity should remain off-limits unless those checks produce authoritative confirmation.

EVIDENCE

- The captured page offers only registrar-provided support and account-management resources, not operator verification.
- The site's identity-verification status is unverified, with no independent identity signals recorded.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The site currently appears to be an unverified parked domain whose external reputation conflicts materially with any assumption of trustworthiness.

Infrastructure Integrity

The domain resolves directly to Namecheap infrastructure in the United States, with one likely origin address and no detected CDN or edge-IP layer. The hosting provider is NAMECHEAP-NET, Namecheap, Inc.; this identifies the service provider but does not validate the domain operator or offset the external reputation findings.

EVIDENCE

- Hosted on AS22612, NAMECHEAP-NET - Namecheap, Inc., US.
- Infrastructure resolution reports 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN was detected in the resolved hosting path.

Closing Assessment

The appropriate disposition is to suspend sensitive use and require independent operator and reputation validation before any future credential, account, or financial interaction.

Written analysis generated 2026-09-24 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of elrneba.com.

- The request stayed on elrneba.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NAMECHEAP INC. [CLEAR](#)
- DNS for this domain is served by namecheaphosting.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-04-16. [NOTED](#)
- It is hosted on NAMECHEAP-NET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about elrneba.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
