Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

ایمالز is an Iranian Persian-language shopping search and price-comparison platform that aggregates products and retailer offers, helping visitors compare prices, discover merchants, browse shopping content, register stores, and access support and mobile applications.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail comparison model with product categories, merchant listings, shopping content, and account functions; the supplied analysis found no phishing, credential-harvesting, brand-impersonation, deceptive financial, or malicious-behavior indicators. External reputation checks were clean, and the site's observed behavior was consistent with an ordinary marketplace portal.

EVIDENCE

- The homepage identifies a price-comparison service and displays retailer products, prices, categories, and shopping searches.
- The homepage analysis recorded no red flags, no sensitive forms, no hidden forms, and no suspected brand impersonation.
- The site's observed behavior recorded no wallet connections, clipboard manipulation, cloaking, suspicious scripts, or non-whitelisted external posts.

Regulatory Verification Notes

The site is presented as a commercial shopping comparison and merchant-registration platform rather than a regulated financial service. Its About, merchant-registration, support, and legal content support an established operating model; however, the supplied material does not identify a regulatory license or registration number, so any review involving merchant obligations should distinguish the platform from the individual retailers it lists. This is a transparency item for business due diligence, not evidence of impersonation or fraud.

EVIDENCE

- The homepage provides navigation for About, stores, merchant registration, support, and legal information.
- The site is registered through IRNIC.
- Hosted on AS43754 (ASIATECH - Asiatech Data Transmission company, IR).
- TLS certificate issued by Certum DV TLS G2 R39 CA (DV), valid to 2027-01-06.

What to Verify Next

For commercial onboarding or higher-value transactions, confirm the relevant retailer’s identity, fulfilment terms, and return conditions independently of the comparison platform. Where regulatory obligations apply to a particular merchant or product category, confirm the merchant’s status with the relevant registry and validate official support channels through an independent route.

EVIDENCE

- The homepage distinguishes the comparison platform from the stores whose products and offers it aggregates.
- Merchant registration and support functions are available from the site’s primary navigation.
- The legal and business-content areas provide the appropriate locations for confirming platform terms and operating disclosures.

Summary Verdict

The website presents as a legitimate, established, and trustworthy consumer-commerce platform with a coherent business purpose and no observed contradiction indicators. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site uses CDN/WAF protection, with observed CDN edge infrastructure and a potential origin candidate; this reduces direct exposure of the service infrastructure but is a mitigating control rather than proof of legitimacy.

Closing Assessment

Standard browsing, account use, and ordinary platform interaction are appropriate, subject to normal merchant and transaction due diligence for individual purchases.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of emails.ir.

- The request stayed on emails.ir. It was not redirected to another domain.

CLEAR

- Registration is published under IRNIC. CLEAR
- DNS for this domain is served by cloudns.net, across 2 name servers. NOTED
- It is hosted on ASIATECH, from a server in IR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about emalls.ir at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
