

Is emergency-plans.com legit? TrustSniffer's high-trust assessment: 100/100

emergency-plans.com

Verdict

100

OUT OF 100

HIGH TRUST

emergency-plans.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

DSAL Consultants, LLC is a consultancy specializing in high-rise fire safety education, creator of staged evacuation procedures adopted by the NFPA, offering online training, on-site training, and fire safety plans for buildings worldwide.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Welcome to DSAL

What emergency-plans.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

emergency-plans.com presents DSAL Consultants, LLC as a corporate consultancy focused on high-rise fire safety education, staged-evacuation procedures, building documentation, and related professional services for building operators and fire departments worldwide.

Scam/Impersonation Risk

No contradictions were observed, including no confirmed phishing, impersonation, blacklist, malicious-content, or external abuse indicators. The homepage presents a coherent corporate identity and business purpose, while the observed site behavior showed no login form, hidden sensitive form, wallet interaction, clipboard manipulation, cloaking, or suspicious external network activity. The site's claims that its staged-evacuation approach was adopted by the NFPA and used by fire departments worldwide are material credibility claims, but they are presented as on-site assertions rather than independently verified identity evidence.

EVIDENCE

- The homepage identifies “DSAL Consultants, LLC,” describes high-rise fire-safety work, and contains no detected scam or impersonation red flags.
- The observed page behavior recorded no hidden forms, password-external forms, wallet-provider activity, clipboard writes, or cloaking.
- The domain registration artifact records creation on 2002-12-01, with an age of 23.73 years.

Regulatory Verification Notes

The site provides a named legal-style entity and describes a conventional business-to-business services model rather than a financial or consumer-investment activity. Its pages include an About section, approval documentation, client references, resources, and contact navigation; however, the available evidence does not independently verify the operator's real-world identity or the site's claims regarding NFPA adoption, worldwide fire-department use, or client scale. No specific professional license, registration number, or regulator is identified in the supplied page evidence, so those matters remain ordinary disclosure and engagement checks rather than indications of a scam. A low authority signal and partial external-reputation coverage are contextual limitations, not adverse findings.

EVIDENCE

- The homepage title identifies “DSAL Consultants, LLC – High-Rise Fire Safety Education,” and the navigation includes About, Approval Documentation, Clients, Resources, and Contact pages.
- The site's transport encryption is a DV certificate issued by YR1, valid through 2026-11-13.
- The site is served from AS26347, DREAMHOST-AS – New Dream Network, LLC, US.
- No match was returned in the supplied third-party broker-reputation context.

What to Verify Next

Before credential or payment interactions, an organization considering engagement should confirm DSAL Consultants, LLC and the relevant service representatives through an independently sourced business record or offline contact route. The NFPA-adoption and client-use claims should be checked against the referenced organizations where those claims materially influence procurement, training approval, or building-safety decisions. Contracting parties should also obtain the applicable service scope, refund or cancellation terms, liability allocation, and any licensing or professional-qualification details relevant to the jurisdiction and service.

EVIDENCE

- The homepage identifies the service provider and makes the NFPA and worldwide-use claims that warrant independent confirmation.
- The site's About, Approval Documentation, Clients, and Contact navigation provides the appropriate locations for obtaining supporting records and engagement terms.
- The available page analysis detected no sensitive submission form, so commercial and credential-handling arrangements should be confirmed through the formal engagement process.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate consultancy and supports a high-trust, low-risk posture. The site does not present observed contradiction or impersonation indicators, although the real-world operator identity remains likely rather than independently verified.

Infrastructure Integrity

The site resolves to a single US-hosted address on AS26347 operated by DREAMHOST-AS – New Dream Network, LLC; no CDN or WAF edge was detected. Its valid DV TLS certificate, issued by YR1, provides transport protection, while the hosting arrangement is a mitigating technical signal only and does not independently establish legitimacy.

Closing Assessment

Normal browsing and ordinary business engagement are proportionate to the available evidence, with independent entity, claim, contractual, and payment-protection checks completed before credentials or funds are exchanged.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	37%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of emergency-plans.com.

- The request stayed on emergency-plans.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by dreamhost.com, across 3 name servers. NOTED
- The registration is paid up to 2026-12-01. NOTED
- The earliest public archive of this site is from 2003-02-14. CLEAR
- It is hosted on DREAMHOST-AS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about emergency-plans.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
