Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a German-language personal food blog presenting recipes, cooking guidance, cookbook content, an online shop, newsletter registration, and social-media references; its apparent business model is content publishing supported by cookbook sales, commerce, and related advertising or affiliate activity.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or other contradiction signals were observed. The homepage presents a coherent personal food-blog identity, with recipe categories, baking and cooking advice, references to four books, and a newsletter rather than a deceptive financial or credential-harvesting proposition. Automated interaction testing recorded some external requests and post-interaction DOM changes, but the page analysis found no cloaking, hidden forms, wallet activity, credential capture, or brand-impersonation indicators; these observations do not establish a scam pattern.

EVIDENCE

- The homepage is titled “Emmi kocht einfach – Der Foodblog für einfache Rezepte, die gelingen” and contains substantial recipe and cooking content.
- Domain registration continuity: registered 2017 (~8.52 years old).
- Web archive history: 323 snapshots spanning 2018–2026 (9 years tracked), with a maximum observed gap of 1 year.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with the domain ranked 21230 and within the top 1 million websites.

Regulatory Verification Notes

The site appears to operate as a consumer-content and cookbook-commerce website, not as a financial, investment, or otherwise regulated service. No regulated-service license claim or registration number is presented in the supplied content, so regulatory licensing is not an applicable basis for endorsement; the relevant transparency question is instead whether the commercial pages identify the seller, provide clear terms, and explain returns and payment handling. The real-world operator is not independently verified, although the site's established content history, coherent business presentation, and clean external reputation are consistent with an apparently legitimate site.

EVIDENCE

- The homepage provides a personal “About” pathway, cookbook references, shop access, and newsletter registration without presenting a regulated financial-service claim.
- The site is served through AS203412, operated by kues-data – KUES DATA GmbH, Germany.
- Transport encryption uses a DV TLS certificate issued by YR1, valid to 2026-10-05T09:27:48+00:00.
- The site's page-authority signal is in the mid range and is used only as contextual support, not as a regulatory determination.

What to Verify Next

Before a purchase or submission of personal information, an independent check should confirm the merchant identity shown at checkout, the applicable returns and cancellation terms, and the payment provider's consumer-protection arrangements. The newsletter should be reviewed for consent, unsubscribe, and data-use information. Where the operator's identity matters for a transaction, contact details should be confirmed through an independent route rather than relying solely on information reached through the same browsing session.

EVIDENCE

- The homepage exposes an “Über mich” page and a shop pathway that can be used to cross-check the seller and transaction terms.
- The site contains one detected form, identified as a newsletter signup rather than a sensitive login form.
- A YouTube social-media reference provides an additional channel for checking continuity of the public-facing identity.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low-risk trust posture. No scam, impersonation, phishing, or blacklist contradictions were observed, but the operator's real-world identity remains likely rather than independently verified.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and the observed edge address is 79.142.46.63; the origin server was not observable in this analysis. This is a mitigating infrastructure control that reduces direct exposure of the origin, but it is not proof of site legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; any credential or payment interaction should remain subject to the normal independent merchant-identity, return-policy, and payment-protection checks appropriate for online commerce.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of `emmikochteinfach.de`.

- The request stayed on `emmikochteinfach.de`. It was not redirected to another domain. CLEAR
- DNS for this domain is served by `cloudflare.com`, across 2 name servers. NOTED
- The earliest public archive of this site is from 2018-02-03. CLEAR
- It is hosted on `kues-data`, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about `emmikochteinfach.de` at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
