- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a bilingual Arabic/French public-sector employment portal presenting government job announcements, application deadlines, department listings, FAQs, and candidate account functions for login, registration, application submission, and tracking. Its apparent purpose is informational and administrative support for public-sector recruitment rather than commercial sales, investment, or advertising.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malware, or conflicting-identity indicators were observed. The site's content is internally consistent with a public employment service: it provides recruitment notices, senior and responsibility positions, expert employment, professional examinations, employee mobility, legal texts, and department information. The presence of ordinary login and registration functions is consistent with candidate account management; testing identified no hidden forms, wallet activity, external password destinations, cloaking, or other abuse patterns. The domain also has sustained historical presence and clean external reputation signals, supporting an established-site interpretation, although the real-world operator identity remains independently unverified.

EVIDENCE

- Domain registration record: registered 2013-05-12 (~13.25 years old).
- Web archive: 163 snapshots spanning 2007–2015 (9 years tracked), with a maximum recorded gap of 1 year.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist match; the site ranked 78958 and was within the top 1 million.
- Homepage and account pages: login, registration, and CAPTCHA forms were present without hidden forms, untrusted destinations, wallet-connect activity, or detected brand impersonation.

Regulatory Verification Notes

The available page content is consistent with a government or public-service recruitment function and does not present a commercial financial product or a claimed financial licence. However, the real-world operator has not been independently verified from the supplied evidence, and the available material does not establish a licence or formal registration record through an external authority. This is a verification and disclosure matter rather than evidence of deception. A broker-reputation dataset contained no matching record, which is supportive context only and not a regulatory determination. The site's established page content, valid transport encryption,

identified hosting, and broad public visibility provide affirmative legitimacy support without proving the legal identity of the operator.

EVIDENCE

- Hosting infrastructure: served from AS328577, Enterprise Services CDG - Enterprise Services CDG, MA.
- TLS certificate: issued by Sectigo Public Server Authentication CA DV R36, validation level DV, valid through 2026-12-12.
- Homepage content: identifies a public employment portal with recruitment announcements, application administration, FAQs, department listings, and employee services rather than a commercial or investment business.
- The supplied regulatory and broker-context evidence contains no independently verified licence, registration, or matching broker record.

What to Verify Next

Before credential submission or any payment-related interaction, an organization should independently confirm that the portal is referenced by the relevant public administration through an official government communication channel. The apparent operator or responsible department should be matched against an authoritative public-sector directory, and the portal's privacy, account-recovery, and application-processing terms should be reviewed. Official support and contact channels should be confirmed through an independent, offline route rather than relying solely on information presented within the site.

EVIDENCE

- Homepage: provides public recruitment categories, application notices, deadlines, and links to government departments and public institutions.
- Account interface: supports candidate login, registration, password recovery, and application-related account activity.
- FAQ and department sections: provide the site areas most relevant to confirming application procedures and responsible administrative bodies.

Summary Verdict

Available evidence supports a **high-trust, low-risk posture** and is consistent with an established, apparently legitimate public-service website. The absence of observed contradictions supports normal informational use, while the unresolved independent identity connection means that credential or payment decisions should remain subject to ordinary institutional verification.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed traffic associated with a CDN edge address rather than an exposed origin. This is a mitigating security control that reduces direct origin exposure, but it is not independent proof of the operator's legitimacy.

Closing Assessment

The portal is suitable for ordinary research and recruitment-related use, with independent confirmation of the responsible public authority and standard payment and credential-protection checks completed before sensitive interactions.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of emploi-public.ma.

- The request stayed on emploi-public.ma. It was not redirected to another domain. CLEAR
- Registration is published under GENIOUS COMMUNICATIONS. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-12. NOTED
- The earliest public archive of this site is from 2007-08-10. CLEAR
- It is hosted on Enterprise Services CDG, from a server in MA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about emploi-public.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
