Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Emunah Masala is an online Indian spice and food-products storefront presenting product categories, shopping-cart and account functions, shipping and payment information, and a dealer-signup pathway for direct-to-consumer sales. The site promotes more than 70 products, free shipping above ₹500, natural ingredients, and quality and hygiene standards.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradiction was observed. The storefront structure is coherent with ordinary food-product ecommerce: it provides product browsing, cart and wishlist functions, account login, shipping and cancellation policies, and standard contact and business-navigation pages. The login form is present but no hidden form, externally directed sensitive form, wallet connection, cryptocurrency activity, or other high-risk abuse mechanism was identified. Interaction telemetry did record substantial page-structure changes and some non-whitelisted network activity, but the available assessment attributes these signals to a low-risk retail site rather than to a confirmed abuse pattern.

EVIDENCE

- The homepage and shop pages present food-product categories, prices, cart functions, and checkout-oriented navigation consistent with ecommerce.
- The account page contains a login function; technical inspection found no hidden forms, password forms sent to external destinations, wallet-drainer behavior, or clipboard-hijacking activity.
- External reputation checks recorded zero malicious and zero suspicious findings, with no confirmed blacklist or phishing result.
- The domain was registered in 2019 (~7.2 years old) through PDR Ltd. d/b/a PublicDomainRegistry.com; archive records contain 242 snapshots spanning 2016–2026, with 11 years tracked.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate retail website, although the real-world operator identity is not independently verified. The site provides terms and conditions, shipping, privacy, cancellation, contact, and dealer pages, which is a useful disclosure framework; however, no business registration or regulatory licence number is claimed in the supplied content. For a food retailer, any applicable local business, food-safety, tax, or consumer-commerce requirements should therefore be checked against the relevant jurisdiction rather than inferred from the website alone. The absence of a broker-dataset match is contextual reputational information and is not a licensing determination.

EVIDENCE

- The site's internal navigation links to About Us, Contact, Become A Dealer, Terms and Conditions, Shipping Policy, Privacy Policy, and Cancellation Policy pages.
- The site's transport encryption uses a DV certificate issued by YE2, valid to 2026-10-06.
- The site is served on AS47583, identified as AS-HOSTINGER — Hostinger International Limited, CY.
- The site presents a standard WordPress/WooCommerce retail implementation, with no licence claim or licence number identified in the business-model content.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer should independently confirm the merchant's legal identity through the contact and About Us pages, validate any applicable food-business or commerce registration with the relevant authority, and review the shipping, cancellation, and privacy terms for consistency with the intended transaction. Payment should use a method providing ordinary purchase protection, and contact-channel details should be confirmed through an independent route where the transaction is material.

EVIDENCE

- The contact and About Us pages are the appropriate locations for confirming the operating entity and transaction support details.
- The Terms and Conditions, Shipping Policy, and Cancellation Policy pages provide the stated contractual and fulfilment framework for review.
- The account and cart functions indicate that credential and payment decisions are the principal sensitive interaction points.

Summary Verdict

The website presents a high-trust, low-risk posture and is apparently legitimate for its stated retail purpose. The evidence supports normal browsing and ordinary ecommerce consideration, while the lack of independently verified operator identity means that legitimacy should be described as evidence-consistent rather than proven.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer between visitors and the site infrastructure, and the observed address was a CDN edge address rather than an exposed origin candidate. This improves resilience and reduces direct origin exposure, but remains an infrastructure control rather than proof of the operator's identity.

EVIDENCE

- Cloudflare CDN/WAF protection was detected; one observed edge address, 195.35.47.65, was associated with AS47583.
- The infrastructure record identified zero likely origin IP candidates during the assessment.

Closing Assessment

The proportionate course is to proceed with ordinary independent merchant-identity, policy, and payment-protection checks before submitting credentials or completing a purchase.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of emunahindianspices.com.

- The request stayed on emunahindianspices.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-10. NOTED
- The earliest public archive of this site is from 2016-11-05. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about emunahindianspices.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
