

Is english-heritage.org.uk legit? TrustSniffer's high-trust assessment: 90/100

english-heritage.org.uk

Verdict

90

OUT OF 100

HIGH TRUST

english-heritage.org.uk appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 75%.

What this site appears to be

Official English Heritage website providing information on places to visit, membership, donations, events, educational resources and practical visitor information.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What english-heritage.org.uk served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the official English Heritage cultural-heritage platform, presenting information about historic places such as Stonehenge, Dover Castle, and Tintagel Castle alongside visitor bookings, memberships, donations, events, educational resources, venue hire, holiday cottages, and shop services. Its apparent business model is institutional and nonprofit-oriented, with revenue derived from admissions, memberships, donations, and related visitor services rather than investment or financial-return offerings.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, blacklist, malicious-reputation, or identity-inconsistency findings. The site's extensive heritage content, consistent institutional navigation, links to four established social platforms, and long-running historical continuity are consistent with an established website. Automated interaction telemetry did identify hidden forms, external posts, and two suspicious inline-script observations; however, page-level review found no red flags, no untrusted form destination, no wallet or cryptocurrency behavior, and no confirmed credential-harvesting pattern. These implementation signals therefore do not establish scam or impersonation risk.

EVIDENCE

- The homepage identifies English Heritage and provides linked sections for visits, support, about-us information, policies, annual reports, careers, and contact services.
- Domain registration continuity indicates a domain age of 28.503764544832308 years.
- Web archives contain 5000 snapshots spanning 1998-02-13 through 2024-08-21, covering 27 tracked years with a maximum gap of 1 year.
- External reputation checks recorded 0 malicious and 0 suspicious detections; the domain had a Tranco rank of 15616 and was within the top 1 million.

Regulatory Verification Notes

The site's apparent legitimacy is supported by a coherent nonprofit cultural-heritage operating model and substantive organisational content, including About Us, people, policies and reports, annual reports, supplier information, and contact pages. No regulated financial-service activity or licensing claim was identified, so the available material does not independently establish a regulatory authorisation status. This is a disclosure and verification point rather than evidence of deception. The real-world operator identity remains likely rather than independently verified, and the site's identity claims should not be treated as conclusive proof of legal ownership.

EVIDENCE

- The About Us area provides organisational information, policies and reports, annual reports, people-related content, and supplier information.
- The support and visitor sections describe memberships, donations, volunteering, ticketing, events, and related cultural services rather than financial returns.
- The site's transport encryption uses a TLS certificate issued by WE1 with DV validation, valid to 2026-09-24T20:58:35+00:00.
- The transport sensor observed service through AS13335, CLOUDFLARENET - Cloudflare, Inc., US.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the merchant or charitable entity through an appropriate official register or a trusted offline contact route. The applicable visitor cancellation, membership, donation, shop, and payment-protection terms should be reviewed directly on the relevant site pages, with payment methods selected that provide appropriate dispute and consumer-protection mechanisms. Official contact channels should also be confirmed through an independently sourced English Heritage reference rather than relying solely on an unsolicited message or referral.

EVIDENCE

- The homepage contains login and donation/checkout forms, making the account and payment terms relevant to ordinary pre-transaction review.
- The visitor area includes practical information and FAQs that can be compared with the applicable booking and cancellation conditions.
- The site's contact area provides general enquiries, visitor FAQs, supplier information, and other organisational contact routes.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, impersonation, phishing, or other contradictory signal was observed, although the operator's real-world identity is not independently verified by the supplied evidence.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed edge delivery through Cloudflare and an infrastructure hosting record identifying AS30811, EPISERVER AS - Optimizely AB, SE. The separation between edge delivery and application hosting is a mitigating security characteristic, although protective infrastructure alone does not prove legitimacy.

Closing Assessment

Normal browsing and ordinary site use are proportionate to the available evidence; account or payment activity should follow the routine independent identity, terms, and payment-protection checks appropriate to the transaction.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of english-heritage.org.uk.

- The request stayed on english-heritage.org.uk. It was not redirected to another domain. [CLEAR](#)
- The earliest public archive of this site is from 1998-02-13. [CLEAR](#)

- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about english-heritage.org.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
