The page as captured

https://englishplusmore.com/

What englishplusmore.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This is an English-language learning website branded “English Plus,” presenting daily lessons, vocabulary development, interactive exercises, quizzes, pronunciation practice, and account registration for a subscription or course-based education service.

Scam/Impersonation Risk

Confirmed blacklist and malicious-detection signals create a critical sensitive-interaction risk, despite the homepage presenting a conventional education service and showing no obvious phishing mechanics in the supplied page analysis. The site’s login and signup functions create an account-credential exposure point; the benign educational content, absence of observed wallet activity, and lack of detected brand impersonation do not offset the external security detections. Abuse reporting applies to shared hosting infrastructure rather than being uniquely attributed to the website, but the separate blacklist and malicious detections remain directly relevant to the domain. No conflicting legal identities or explicit brand impersonation were observed.

EVIDENCE

- The homepage presents “English Plus” with structured English lessons, vocabulary, interactive practice, quizzes, pronunciation exercises, and free signup.
- The homepage contains two account forms: one login form and one signup form; no hidden forms or external password submissions were detected.
- External reputation checks recorded 14 malicious detections, including flags from Fortinet and Sophos, and identified the domain on a blacklist.
- The domain was registered on 2022-03-03 and is approximately 4.47 years old; historical records identify coverage from 2013-05-08 through 2025-06-16 across 13 tracked years.

Regulatory Verification Notes

The supplied site content identifies the service as “English Plus” and provides a contact channel, but it does not present a legal entity, licensing authority, registration number, or other independently verifiable operator details. For an English-learning service, licensing may not be required, but the absence of a clearly identified contracting entity remains a material disclosure gap before any paid subscription or course purchase. The available broker dataset returned no name match; this is contextual only and does not establish licensing or legitimacy.

EVIDENCE

- The homepage footer states “English Plus” and displays a copyright notice for 2026, but no legal company name or registration details are shown in the supplied content.
- The site’s transport encryption is a DV certificate issued by YE1, valid through 2026-09-22.
- The website is served through AS16509, operated by AMAZON-02 / Amazon.com, Inc., US.

What to Verify Next

Before any account creation or paid engagement, an independent check should confirm the operator’s legal identity, applicable consumer or education-business registration, subscription terms, cancellation rights, and refund process. The official contact channels should be confirmed through an independently sourced route rather than relying solely on the homepage. Any credential intended for use elsewhere should remain unique, and payment should not be initiated until the contracting entity and payment protections are established.

EVIDENCE

- The homepage offers “S’inscrire gratuitement” and “Se connecter,” confirming that account creation and login are central interaction paths.
- The supplied page content describes likely monetization through subscriptions or course sales, but does not provide payment, refund, or cancellation terms.
- The homepage contains a “Contact” navigation item and a published contact channel, providing a basis for independent channel confirmation.

Summary Verdict

The website has a conventional educational presentation, but the authoritative assessment is that it carries a critical trust posture for sensitive interaction. External malicious detections and confirmed blacklist status

outweigh the otherwise ordinary page content and valid transport security.

Infrastructure Integrity

The site is protected by AWS CDN/WAF infrastructure, with observed edge addresses in AS16509 and no origin candidates visible in this analysis. This provides a meaningful defensive layer against direct origin exposure, but infrastructure protection is only a mitigating technical control and is not evidence of operator legitimacy.

Closing Assessment

The appropriate course is to restrict activity to passive viewing until the operator, account handling, and commercial terms have been independently confirmed; credentials, personal information, and payment details should not be submitted in the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 654 reports on hosting IP 63.176.8.218 (A100 ROW GmbH, Data Center/Web Hosting/Transit), 21% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of englishplusmore.com.

- The request stayed on englishplusmore.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by nsone.net, across 4 name servers. NOTED
- The registration is paid up to 2027-03-03. NOTED
- The earliest public archive of this site is from 2013-05-08. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about englishplusmore.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
