

Is enkayblr.com a scam? TrustSniffer's high-risk assessment: 0/100

enkayblr.com

Verdict

0

OUT OF 100

CRITICAL RISK

enkayblr.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A WordPress-hosted blog focused on online casinos and gambling commentary with local contact details for Naik Kotrappa & Associates (chartered accountants). No forms or financial transaction flows are present on the captured page.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://enkayblr.com/

What enkayblr.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a WordPress-hosted blog titled “Naik Kotrappa & Associates” that publishes commentary about online casinos, gaming mechanics, and sports-betting sites while displaying local contact details associated with a chartered-accountancy practice; its apparent business model is advertising-supported informational content rather than direct user payments.

Scam/Impersonation Risk

The site presents no observed login form, credential-collection mechanism, or financial transaction flow on the captured homepage, and its visible content is consistent with a gambling commentary blog. However, this benign page presentation is materially outweighed by confirmed external threat detections: the domain is **blacklisted**, with malicious classifications from multiple security providers, including Fortinet, Kaspersky, and Sophos. The convergence of those detections is a direct contradiction to the otherwise ordinary blog presentation. No separate evidence establishes brand impersonation or an identity contradiction between legal entities.

EVIDENCE

- Homepage: displays casino and gaming articles concerning Jack Casino, Lightning Sicbo, Boo Casino, SlotoCash UK casino, and PlayUzu, with no visible login or payment form.
- External reputation telemetry: 17 malicious detections and 1 suspicious detection from 23 evaluated results; Fortinet, Kaspersky, and Sophos were among the flagged providers.
- Domain registration record: registered 2019-05-09 and recorded as approximately 7.29 years old.
- Web-archive record: first seen 2011-01-28, last seen 2026-03-10, with 16 years tracked.

Regulatory Verification Notes

The available site content does not establish a verified real-world operator for the domain. The homepage associates the title “Naik Kotrappa & Associates” with chartered-accountancy contact details while publishing gambling-related material, but the supplied evidence does not establish the legal relationship between that professional practice and the website. No gambling, advertising, or other regulatory licence is claimed or verified in the supplied site material. This is a regulatory-disclosure gap rather than, by itself, proof of fraud; nevertheless, it is significant when considered alongside the confirmed external blacklist status.

EVIDENCE

- Homepage: title and displayed business identity are “Naik Kotrappa & Associates,” while the published subject matter is online casinos and gambling commentary.
- Technical registration record: registrar is GoDaddy.com, LLC; creation date is 2019-05-09 and expiry date is 2027-05-09.
- Hosting and transport telemetry: served from AS47583, AS-HOSTINGER – Hostinger International Limited, CY; TLS uses issuer YE2 with DV validation and is valid to 2026-10-01T07:00:44+00:00.

What to Verify Next

Before any sensitive interaction, an independent source should confirm that the named accountancy practice knowingly operates or endorses the domain. Any claimed gambling or advertising authorization should be checked directly with the relevant jurisdictional regulator rather than relying on site content. Contact details should be validated through an independently sourced business directory or offline channel, and the domain should remain excluded from credential, account, payment, or other financially consequential workflows unless the external detections are resolved by the responsible security team.

EVIDENCE

- Contact page and homepage: provide local business contact details that require independent confirmation of the website relationship.
- Legal and identity pages: do not supply a clear, independently verifiable licensing or operating-authority basis in the available material.
- Site behavior: two successful observation runs recorded no wallet connection, hidden forms, password-external forms, clipboard manipulation, or credential-harvesting form.

Summary Verdict

The overall posture is critical, with sensitive interaction risk controlling the assessment. The website may be readable as an informational blog, but the available evidence does not support treating it as a trusted destination for authenticated, credentialed, or financial activity.

Infrastructure Integrity

The domain resolves directly to one likely origin address on Hostinger infrastructure in Lithuania, with no CDN or WAF detected and no edge-IP layer identified. The valid DV TLS certificate protects transport confidentiality, but it does not establish operator legitimacy or offset the external reputation contradiction.

EVIDENCE

- Hosting resolution: 1 unique IP, 0 edge IPs, and 1 likely origin IP; CDN detection is false.
- Network infrastructure: AS47583, registry RIPE NCC, country LT; hosting provider is AS-HOSTINGER – Hostinger International Limited, CY.

Closing Assessment

Prospective users should limit activity to non-sensitive viewing and should not log in, submit credentials, provide payment information, or initiate financial transactions through the site unless independent identity and security validation materially changes the assessment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of en kay b l r . c o m .

- The request stayed on en kay b l r . c o m . It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-09. NOTED
- The earliest public archive of this site is from 2011-01-28. CLEAR
- It is hosted on AS-HOSTINGER, from a server in LT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about en kay b l r . c o m at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
