Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Entiva Studio is a Polish interior design and home-services website presenting interior, garden, façade and related design services, including functional and execution-ready projects, 3D visualizations and project supervision. Its apparent business model is the delivery of client-paid design consultations and project services through a local service-studio relationship.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent, ordinary service model rather than financial, cryptocurrency, credential-harvesting or other abuse-oriented activity. Its homepage describes design work for apartments, houses, gardens and offices, explains that quotations depend on client requirements, property size and location, and directs visitors toward service enquiries. Technical behavior also showed no login form, sensitive form, wallet connection, hidden form, cloaking or brand-impersonation indicator. The site's apparent legitimacy is therefore evidence-consistent, although the real-world operator identity remains independently unverified. Evidence:

- Homepage: identifies Entiva Studio as an interior-design business offering projects, 3D visualizations and supervision.

- Homepage: describes a client consultation and quotation process based on project needs, area and location.
- Observed site behavior: no login form, sensitive form, wallet interaction, hidden form or suspected brand impersonation was detected.
- Domain registration record: registered 2014-02-26 through OVH SAS, with an age of 12.49 years.

Regulatory Verification Notes

The available content supports an established local professional-services presentation, but it does not independently establish the legal person contracting with clients. No regulated-sector license claim or license number was identified; for an interior-design service, this is best treated as a transparency and contracting check rather than evidence of wrongdoing. The site's transport security and hosting records provide technical support for an established web presence, while the absence of a matching broker-reputation record is contextual only and is not a regulatory determination. Evidence:

- Domain registration record: registrar is OVH SAS; expiration is 2028-02-26.
- Hosting telemetry: served from AS48896, DHOSTING-AS - dhosting.pl Sp. z o.o., PL.
- TLS telemetry: RapidSSL TLS RSA CA G1, Domain Validation (DV), valid to 2026-12-28T23:59:59+00:00.
- Available regulatory-content review: no license claim or license number was identified on the examined site content.

What to Verify Next

Before a paid engagement or submission of personal information, independently confirm the contracting entity, obtain a written scope of work and fee schedule, and review the applicable cancellation, dispute and refund terms. Contact details should be corroborated through an independent business source or offline route, and any claimed professional or commercial registration should be checked with the relevant Polish registry where applicable. Payment should use a method offering appropriate transaction dispute and recovery protections. Evidence:

- Service pages: pricing is described as dependent on consultation, requirements, area and location, supporting the need for a written quotation.
- Available site content: the business presentation is service-oriented but does not independently connect the studio name to a verified legal entity.
- Regulatory-content review: no licensing or registration reference was identified for independent confirmation.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk website operated as a local interior-design service. The site has a coherent commercial purpose and no observed scam, phishing or impersonation contradiction, while operator identity should remain treated as unverified rather than proven.

Infrastructure Integrity

The site resolves to one hosting endpoint in Poland on DHOSTING-AS - dhosting.pl Sp. z o.o. (AS48896); no CDN or WAF vendor was detected. This is a straightforward hosting posture and offers limited infrastructure-based assurance, so it should be regarded as technical context rather than proof of legitimacy.

Closing Assessment

Ordinary engagement is proportionate to the assessment, subject to independent confirmation of the contracting party, written commercial terms and payment protections before credentials or payment details are provided.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of entivastudio.pl.

- The request stayed on entivastudio.pl. It was not redirected to another domain. CLEAR
- Registration is published under OVH SAS. CLEAR
- DNS for this domain is served by dhosting.pl, across 2 name servers. NOTED
- The registration is paid up to 2028-02-26. CLEAR
- The earliest public archive of this site is from 2014-06-15. CLEAR
- It is hosted on DHOSTING-AS, from a server in PL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about entivastudio.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
