

Is enviou.com.br legit? TrustSniffer's high-trust assessment: 80/100

enviou.com.br

Verdict

80

OUT OF 100

HIGH TRUST

enviou.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Marketing automation SaaS targeted at online stores and retailers. Describes features such as cart recovery, boleto payment reminders, repurchase scheduling, navigation abandonment recovery, customizable triggers, email marketing, and cashback/loyalty programs. Shows integrations list, contact email, physical address, and CNPJ number.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Enviou.com.br is a marketing automation SaaS platform for online stores and retailers, presenting tools intended to increase e-commerce conversions through customer re-engagement, payment reminders, repeat-purchase scheduling, messaging, and loyalty programs.

Scam/Impersonation Risk

No contradictions were observed, including no phishing, impersonation, blacklist, or malicious-reputation indicators. The homepage presents a coherent subscription software model covering cart recovery, boleto-payment reminders, repurchase scheduling, browsing-abandonment recovery, customizable triggers, email marketing, SMS, WhatsApp, and cashback or giftback programs. These are commercially consistent features for an e-commerce marketing platform rather than mechanisms associated with an abusive or deceptive site. Some dynamic page changes and external requests were observed during behavioral review, but they were not accompanied by untrusted destinations, cloaking, hidden forms, wallet activity, clipboard manipulation, or other confirmed abuse patterns. The real-world operator remains independently unverified, so the legitimacy assessment is evidence-consistent rather than identity-proven.

EVIDENCE

- The registration record shows the domain was registered in 2013 and is approximately 13.15 years old.
- Historical web captures comprise 209 snapshots spanning 2011–2026, with 16 years tracked.
- External reputation checks recorded zero malicious and zero suspicious detections, no malicious search-safety result, and no blacklist hit for the domain.

Regulatory Verification Notes

The homepage supplies a physical address and a CNPJ number, providing substantive business-contact and corporate-identification disclosures. No regulated financial-service claim, license number, or licensing authority was identified in the supplied site content; for this software business, that is a transparency and verification matter rather than evidence of deception. The absence of a broker-dataset match is a limited reputational signal only and is not a legal or licensing determination. The available evidence is consistent with an established, apparently legitimate commercial technology provider, while independent confirmation of the operating entity is still appropriate.

EVIDENCE

- The homepage identifies the service as e-commerce and retail marketing software and displays a physical address and CNPJ number.
- The site is served from AS13335, Cloudflare, Inc.; its TLS certificate was issued by YE1 at DV validation level and is valid to 2026-09-21.
- The page-authority assessment places the site in a mid-level authority band, supporting an established web presence without independently proving ownership or legal status.

What to Verify Next

Before credential or payment interactions, independently confirm that the CNPJ and physical address correspond to the business operating the service, and compare the site's terms, privacy provisions, subscription conditions, cancellation process, and applicable service commitments with that entity. Account access should be reached through an independently confirmed official channel, and payment arrangements should be reviewed for ordinary merchant protections and clear billing controls.

EVIDENCE

- The homepage provides the corporate and physical-contact details needed for an independent business-registry comparison.
- The captured page displays "Entrar" and "Criar Conta" navigation, while no login form was present in the captured content.
- The site's stated subscription-SaaS model makes billing, cancellation, data-processing, and service terms the most relevant commercial checks.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence converging on an established, apparently legitimate website and no observed scam or impersonation contradictions. Confidence in the trust classification is strong, but the connection between the website and a specific real-world operator has not been independently verified.

Infrastructure Integrity

Cloudflare CDN and WAF protection sit in front of the website, and all observed addresses were CDN edge infrastructure rather than identified origin candidates. This reduces direct exposure of the hosting environment and is a mitigating infrastructure signal, not proof of legitimacy.

Closing Assessment

Ordinary evaluation and use may proceed, provided independent merchant-identity, service-term, and payment-protection checks are completed before credentials or payments are submitted.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of `enviou.com.br`.

- The request stayed on `enviou.com.br`. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by `cloudflare.com`, across 2 name servers. [NOTED](#)
- The registration is paid up to 2028-06-23. [CLEAR](#)
- The earliest public archive of this site is from 2011-09-27. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about `enviou.com.br` at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
