

Is epoksis.com a scam? TrustSniffer's high-risk assessment: 0/100

epoksis.com

Verdict

0

OUT OF 100

CRITICAL RISK

epoksis.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for Epoksis, a Turkish flooring and waterproofing contractor. The site lists services (epoxy, self-leveling, polyurea, polyurethane, terrazzo, microcement, injection waterproofing), contact numbers, email and physical address, and encourages users to request quotes. No forms or financial-transaction flows detected in the provided DOM snapshot.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What epoksis.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Turkish corporate service site for Epoksis, presenting epoxy, self-leveling, polyurea, polyurethane, terrazzo, microcement, and waterproofing services through company-profile, gallery, references, contact, and quotation-request pages. Its apparent business model is lead generation for commercial flooring, surface-treatment, and waterproofing projects rather than an online financial or investment service.

Scam/Impersonation Risk

Confirmed external threat signals materially outweigh the site's otherwise ordinary presentation. Multiple external detections classify the domain as malicious or suspicious, including 11 malicious and one suspicious detection, with Fortinet and Sophos among the flagged vendors; the domain is also recorded on external blacklists. These findings constitute a serious contradiction to the professional contractor presentation and support a high-risk posture for sensitive interaction. The page analysis found no brand-impersonation, phishing, login-form, hidden-form, or financial-transaction indicators, and the site's stated contractor model contains no

obvious deception signals; however, those benign page-level observations do not neutralize the confirmed external reputation findings.

EVIDENCE

- The external reputation assessment recorded 11 malicious detections, 1 suspicious detection, and 2 Tier-1 flagged vendors: Fortinet and Sophos.
- The domain was identified as blacklisted by the external sources recorded in the assessment.
- Historical records show 66 archive snapshots spanning 2018–2026, covering 9 years tracked.
- Domain registration records show creation on 2017-12-27T19:22:21Z, making the domain approximately 8.65 years old.

Regulatory Verification Notes

The company-profile, contact, and service pages provide a commercial identity and physical contact presentation, but the supplied site content does not state a licensing authority, registration number, or independently verifiable regulatory authorization. For a contracting business, this is a disclosure and counterparty-verification gap rather than, by itself, evidence of a scam. The operator's real-world identity remains unverified, so the on-site presentation should not be treated as proof of the legal entity behind the domain. The domain is registered through Isimtescil Bilisim A.S.; this is an administrative registration fact and does not establish the operator's legitimacy.

EVIDENCE

- The "Kurumsal / Şirket Profili," "Hakkımızda," "Misyonumuz," and "Vizyonumuz" pages present the business identity and operating description.
- The legal and company-content pages supplied for review contain no stated license authority or license number.
- The site's hosting infrastructure is served from AS207326, HostLAB - HostLAB Bilisim Teknolojileri A.S., TR.
- The site's transport encryption uses a DV TLS certificate issued by YR1, valid to 2026-11-06T20:32:52+00:00.

What to Verify Next

Before any sensitive interaction or commercial commitment, the counterparty should be validated through an independently obtained Turkish company registry record and, where applicable, the relevant trade or construction-services authority. Quotation details, physical premises, project references, contractual terms, invoicing entity, and payment beneficiary should be reconciled through contact information obtained from an independent business source rather than relying solely on the website. Any proposed payment should use a protected commercial payment method with documented dispute rights.

EVIDENCE

- The “Teklif Formu” and “İletişim” pages identify the intended quotation and contact channels that require independent corroboration.
- The “Referanslarımız” and “Galeri” pages provide claimed project evidence that can be checked with named customers or property owners through separate channels.
- The site's supplied DOM snapshot contains no online payment or sensitive-data form, so any later payment or credential request should be treated as a separate interaction requiring validation.

Summary Verdict

The overall posture is **critical trust risk**. The site has a coherent local-contractor presentation and a long-standing domain record, but the confirmed malicious detections and blacklist status create a decisive contradiction that prevents the website from being treated as trustworthy for sensitive interaction. Identity verification remains unresolved.

Infrastructure Integrity

The site resolves directly to a likely origin address rather than a detected CDN edge, with no CDN or WAF identified in the supplied infrastructure facts. This provides no meaningful protective infrastructure mitigation against the external reputation findings.

Closing Assessment

Prospective users should limit activity to non-sensitive observation and defer login, credential submission, financial activity, or commercial commitment until the counterparty and requested interaction have been independently validated.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of epoksis.com.

- The request stayed on epoksis.com. It was not redirected to another domain. CLEAR
- Registration is published under Isimtescil Bilisim A.S. CLEAR
- DNS for this domain is served by akademigrafik.com, across 2 name servers. NOTED
- The registration is paid up to 2030-12-27. CLEAR
- The earliest public archive of this site is from 2018-01-01. CLEAR
- It is hosted on HostLAB, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about epoksis.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
