

Is escolavirtual.gov.br legit? TrustSniffer's high-trust assessment: 100/100

escolavirtual.gov.br

Verdict

100

OUT OF 100

HIGH TRUST

escolavirtual.gov.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Official Brazilian government virtual school (Escola Virtual.Gov) offering a catalog of courses and programs for public servants and citizens, covering topics like digital government, public policy, management, and technical training.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Escola Virtual Gov is a Brazilian public-sector educational portal presenting free online courses, short learning content, and structured programs for civil servants and citizens, with subject matter spanning digital government, public policy, administration, management, cybersecurity, and technical training.

Scam/Impersonation Risk

No contradictions were observed. The site's institutional presentation, government-sector educational purpose, and absence of phishing, impersonation, malicious-content, or deceptive-behavior indicators are mutually consistent with an apparently legitimate established service. Independent operator identity is not fully proven by the available evidence, so the conclusion is evidence-consistent rather than an affirmation of legal identity.

EVIDENCE

- The homepage identifies Escola Virtual Gov and presents a substantial catalog of public-administration, digital-government, policy, management, and technical-training content.
- The reviewed content showed no phishing indicators, hidden forms, wallet activity, cloaking, suspicious scripts, or external sensitive-form submissions.
- The domain was registered on 2016-08-29 and is approximately 9.96 years old.
- Major external reputation checks recorded 0 malicious detections, 0 suspicious detections, and no confirmed malicious or phishing status.

Regulatory Verification Notes

The available material presents the service as a government educational portal rather than a financial or investment platform. The page-level identity is consistent with the Escola Virtual Gov institutional purpose, and the registration record names Escola Nacional de Administração Pública (ENAP); however, the real-world connection between the website and that institution is not independently verified by the supplied evidence. No licensing or registration number is presented in the reviewed material; for this non-financial education model, that is a transparency item for confirmation rather than evidence of deception. No adverse broker-reputation match was identified.

EVIDENCE

- The homepage includes institutional government navigation and describes learning resources for public servants and citizens.
- The registration record identifies Escola Nacional de Administração Pública (ENAP) as the registrant.
- The site is served from AS16509, Amazon.com, Inc. (AMAZON-02 - Amazon.com, Inc., US).
- The transport certificate is Domain Validated (DV), issued by Amazon RSA 2048 M04, and valid to 2027-02-11T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, independently confirm the institutional identity through an official government source accessed separately from the website. Review the applicable account, privacy, and service terms, and confirm through an independent official channel that any account-related communication or payment request is genuine and covered by appropriate payment protections.

EVIDENCE

- The reviewed evidence supports a likely institutional identity but does not independently verify the operator.
- The site's stated model is public-sector education, so any request for payment or unusually sensitive information should be reconciled with that stated purpose.
- The available capture includes an "Entrar" access route but no captured sensitive login form or payment form.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate website. The classification supports ordinary educational use, while the connection to a specific real-world operator remains not independently proven.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, which mitigates direct exposure of the underlying service and is a positive resilience signal, although protective hosting alone does not establish legitimacy. The observed delivery infrastructure is associated with Amazon, and no origin server candidate was identified in the infrastructure assessment.

EVIDENCE

- AWS CDN/WAF protection was detected.
- One CDN edge IP was observed: 54.207.193.111.
- The infrastructure assessment identified no likely origin IP candidate.

Closing Assessment

Ordinary use is proportionate to the high-trust assessment; credential or payment activity should follow the standard independent identity, policy, and payment-protection checks described above.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Identity verified on page
- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of `escolavirtual.gov.br`.

- The request stayed on `escolavirtual.gov.br`. It was not redirected to another domain. CLEAR
- DNS for this domain is served by `awsdns-06.net`, across 4 name servers. NOTED
- It is hosted on `AMAZON-02`, from a server in `US`. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about escolavirtual.gov.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
