Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Estadão MT is a Portuguese-language regional news portal focused on Cuiabá and Mato Grosso, presenting reporting on politics, public safety, cities, sports, economy, health, culture, opinion, videos, and legal notices. Its apparent business model is advertising-, sponsored-content-, and audience-supported journalism.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent regional-news identity, substantial editorial content, publication information, and no phishing, deceptive financial behavior, impersonation, or suspicious form activity. External reputation checks found no malicious or suspicious classification, and the site's content and behavior are consistent with ordinary journalism operations.

- Homepage: "Estadão MT" content covers regional news, politics, crime, cities, sports, economy, health, opinion, and videos.
- Homepage: No login form, hidden sensitive form, wallet connection, or external password submission was detected.
- Homepage and technical reputation: No malicious or suspicious findings were recorded; the domain is ranked within the global top one million.
- Domain registration: Created 2020-01-18; approximately 6.54 years old.

Regulatory Verification Notes

The site presents itself as a journalism publisher rather than a financial or investment service, so no financial licensing claim is expected from the business model evidenced here. Publication information, advertising, sponsored content, and legal notices are consistent with that role. No separate regulated-entity affiliation or licensing assertion is evidenced, but this is a transparency point for formal commercial due diligence rather than an indication of deception. The available third-party broker context contains no match.

- Homepage: Business presentation is regional journalism supported by advertising, sponsored content, legal notices, and audience engagement.
- Homepage: No financial product, investment solicitation, or regulatory authorization claim is presented.
- Hosting telemetry: Served from AS13335, Cloudflare, Inc.; registry ARIN; country US.
- TLS telemetry: Certificate issued by WE1, DV validation, valid to 2026-10-14.

What to Verify Next

For any formal partnership, advertising agreement, or material payment, independently confirm the publisher’s legal and commercial details through an official corporate or media registry and use contact channels obtained from an independently verified source.

- Homepage: Publication information and legal-notice content provide the appropriate basis for organizational verification.
- Homepage: The business model is advertising- and audience-based rather than financial-product-based.
- Technical service: The site resolved successfully and completed two successful behavioral runs.

Summary Verdict

The website is a legitimate, established regional news service with a coherent identity, benign content, and no observed contradiction or abuse pattern. Its overall trust posture supports normal interaction, including account login where offered and standard site use.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN/WAF infrastructure. All four observed addresses were CDN edge servers on AS13335, with no origin candidate observed; this reduces direct exposure of the origin and is a mitigating infrastructure control, not proof of legitimacy.

Closing Assessment

Normal browsing, login, and standard interaction are appropriate, with routine independent due diligence proportionate to any formal commercial engagement.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [estadaomatogrosso.com.br](#).

- The request stayed on [estadaomatogrosso.com.br](#). It was not redirected to another domain. CLEAR
- DNS for this domain is served by [cloudflare.com](#), across 2 name servers. NOTED
- The registration is paid up to 2031-01-18. CLEAR
- It is hosted on [CLOUDFLARENET](#), from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about estadaomatogrosso.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
