Full analysis

Security Alert

Fortinet, Google, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a coming-soon landing page for “Estudio Contable Kohler,” presenting accounting, tax planning, payroll, audit, and broader business-consulting services for SMEs, entrepreneurs, and corporate clients, with the apparent purpose of generating preliminary inquiries while the full site is under construction.

Scam/Impersonation Risk

No brand impersonation, identity inconsistency, login form, or phishing-style interaction was observed in the supplied page content. However, this benign presentation is materially outweighed by confirmed external threat signals: the domain is blacklisted, a major safe-browsing service identified it as malicious, and 19 evaluated detections classified it as malicious, including coverage from three major security providers. The site’s stated accounting-firm purpose therefore cannot be treated as sufficient evidence of legitimacy, and sensitive interaction should not proceed. No suspicious contact-email anomaly was identified in the supplied findings.

EVIDENCE

- The homepage is a 654-character coming-soon page identifying “Estudio Contable Kohler” and offering accounting and tax-related services; it contains no login or sensitive-data form.
- External reputation checks recorded 19 malicious detections, a malicious safe-browsing result, and an active blacklist status.
- The domain was registered in 2021 and is approximately 4.71 years old.

Regulatory Verification Notes

The available page content provides only a limited business presentation and does not establish the real-world operator’s identity independently. No licensing authority, registration number, or regulated-service authorization is claimed in the supplied content; this is a regulatory disclosure gap rather than, by itself, proof of fraud. The site’s minimal landing-page format also provides insufficient legal, corporate, or governance information for institutional onboarding. No matching broker signal was identified in the available third-party context.

EVIDENCE

- The homepage states that the site is under construction and describes accounting, tax, payroll, audit, and SME-consulting services, but supplies no licensing or registration particulars.
- No legal, terms, privacy, or dedicated corporate-identity page is evidenced in the supplied site map.
- The site’s transport encryption uses a DV certificate issued by YR2, valid until 2026-11-05.

What to Verify Next

Any prospective engagement should first confirm the named accounting practice and its responsible professionals through an independently sourced business registry or professional association, rather than relying solely on the website. Licensing or professional-registration claims should be checked directly with the relevant jurisdictional authority, and contact channels should be confirmed through an independent offline route before any confidential information, payment, or account access is considered.

EVIDENCE

- The supplied identity-verification status is unverified, with no independent identity signals recorded.
- The page is a coming-soon landing page with no external links, structured corporate data, or documented legal disclosures.
- The business description concerns professional accounting and tax services, making professional-authority verification materially relevant before engagement.

Summary Verdict

The domain has a **critical trust posture** driven by convergent external malicious and blacklist indicators, despite the apparently ordinary accounting-service presentation and the absence of harmful interactive features on the captured page. The available evidence does not support treating the site as a trusted destination for credentials, confidential information, payments, or other sensitive interaction.

Infrastructure Integrity

The site resolves directly through AS27823 infrastructure operated by Dattatec.com in Argentina; no CDN or WAF was detected, and the infrastructure analysis identified two likely origin addresses. This provides no substantial protective mediation, although the hosting environment itself is a concrete, resolved network presence rather than an unresolvable endpoint.

Closing Assessment

The appropriate posture is passive observation only while independent identity, professional authorization, and contact-channel checks are completed; sensitive interaction should remain excluded unless those checks produce satisfactory results.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about estudiokohler.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
