Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Estudio Lacerra is a local real-estate agency website presenting residential and commercial properties for sale and rent in La Plata, Berisso, and nearby areas. It provides property descriptions, asking prices, valuation requests, contact options, and subscription-based updates, indicating a brokerage and lead-generation business model.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional real-estate agency: it contains property listings, prices, contact and valuation forms, and no observed login, wallet, cryptocurrency, or investment functionality. However, this benign presentation is materially outweighed by a **confirmed blacklist detection**, which is the decisive contradiction in the assessment. The available evidence does not establish that the site is impersonating a named brand, and no identity inconsistency was observed, but the external reputation signal warrants treating unsolicited contact, document exchange, and transaction requests as high-risk until independently resolved.

EVIDENCE

- The homepage and property pages present real-estate listings and prices rather than financial, cryptocurrency, or credential-harvesting services.
- The site's contact and valuation pages use ordinary inquiry forms; no login form or hidden sensitive form was detected.
- External intelligence records the domain as blacklisted; additional evaluation recorded 1 malicious and 2 suspicious detections.
- Domain registration: 2016-10-07T12:43:47Z, approximately 9.87 years old.

Regulatory Verification Notes

The website's apparent business activity is real-estate brokerage, but the available material does not independently verify the operating entity or any applicable real-estate registration or professional authorization. Licensing and registration disclosure should therefore be treated as unresolved verification matters, not as standalone evidence of fraud. The domain is registered through GoDaddy.com, LLC, while the registrant information identifies Registration Private and Domains By Proxy, LLC; this is an administrative registration arrangement and does not independently establish the agency's legal identity. The site's transport security is valid, but certificate validation is domain-level rather than organization-level.

EVIDENCE

- The site's "Contactenos" and "Tasaciones" sections provide agency contact and valuation pathways, but the supplied content does not confirm a license number or licensing authority.
- Domain registrar: GoDaddy.com, LLC; creation date 2016-10-07T12:43:47Z; expiration date 2027-10-07T12:43:47Z.
- Hosted on AS14061 (DIGITALOCEAN-ASN – DigitalOcean, LLC, US).
- TLS certificate issued by YR2 using DV validation, valid to 2026-10-30T14:38:21+00:00.

What to Verify Next

Before any deposit, property reservation, transfer of funds, or submission of identity and property documents, an independent party should confirm that Estudio Lacerra is a currently operating agency through the relevant local professional or business registry. Property ownership, authority to market each listing, beneficiary details for any payment, and the agency's contractual terms should be verified using records and contact routes obtained independently of the website. The blacklist detection should also be escalated for direct resolution before sensitive interaction proceeds.

EVIDENCE

- The sale, rental, and valuation sections create transaction-related lead paths that require independent confirmation of agency authority.
- The contact and subscription forms provide channels for collecting inquiries and email addresses.
- The external reputation result is a domain-level warning requiring resolution before financial or sensitive-document activity.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site's content appears commercially coherent, but the confirmed adverse reputation signal and lack of independently verified operator identity prevent a reliable legitimacy conclusion.

Infrastructure Integrity

A CDN/WAF layer is present, and observed traffic resolved through an edge address associated with AS14061 and DigitalOcean, LLC; the origin was not observable in this analysis. This protective layer may reduce direct exposure of the hosting environment, but it is only a mitigating technical control and does not offset the site's adverse reputation signal.

Closing Assessment

The site should be treated as read-only until the agency, listing authority, payment destination, and applicable registration status have been independently confirmed through trusted external channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.

Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of estudiolacerrainmo.com.

- The request stayed on estudiolacerrainmo.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by pixelinmobiliario.red, across 2 name servers. NOTED
- The registration is paid up to 2027-10-07. CLEAR
- The earliest public archive of this site is from 2017-04-28. CLEAR
- It is hosted on DIGITALOCEAN-ASN, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about estudiolacerrainmo.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
