

Is etdbook.com legit? TrustSniffer's high-trust assessment: 93/100

etdbook.com

Verdict

93

OUT OF 100

HIGH TRUST

etdbook.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Persian-language online bookstore (انتشارات توسعه دهندگان) selling books and DVDs with product listings, prices, shopping cart, contact information and delivery/return policies.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a Persian-language online bookstore operated under the displayed name “انتشارات توسعه دهندگان,” presenting printed books, DVDs, packaged book-and-DVD sets, product pricing, shopping-cart functionality, wholesale ordering, contact information, and delivery and return policies as a direct retail ecommerce business.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent bookstore model rather than a deceptive investment, cryptocurrency, or impersonation proposition, and the available checks recorded no malicious, phishing, or brand-impersonation finding. The account-login capability is consistent with ordinary ecommerce functionality, while observed browser behavior showed no external posting, wallet-drainer, clipboard-hijacking, cloaking, or hidden-form activity.

EVIDENCE

- Homepage: Displays the bookstore identity, product catalogue, prices, shopping cart, and checkout flow in a consistent retail presentation.
- Homepage behavior: Recorded zero external XHR requests, zero external POST activity, no hidden forms, no wallet-provider detection, and no cloaking classification.
- Domain registration: Created 2018-07-02T07:33:29Z; age 8.14 years; registrar 1API GmbH.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate retail website, but the real-world operator identity is not independently verified. The legal and identity disclosure position is unclear, and the site does not present a regulatory licence or registration number; for a bookstore, this is a transparency and merchant-verification point rather than evidence of a scam. The site does provide operational disclosures relevant to retail transactions, including contact information and delivery and return policies. No matching third-party broker-reputation record was identified, although that context is not a licensing determination.

EVIDENCE

- Hosting infrastructure: Served from AS212216, Netafraz - Netafraz Iranian Ltd., IR.
- Transport encryption: TLS certificate issued by YR1 at DV validation level, valid to 2026-10-23T21:43:55+00:00.
- Homepage and retail-policy content: Include contact information together with delivery and return-policy references.
- Legal and identity pages: No licence or registration number is presented in the supplied site content.

What to Verify Next

Before credential or payment interactions, an organisation considering engagement should independently confirm the merchant identity through an official or offline contact route, review the stated return and delivery terms against the proposed transaction, and use payment methods offering appropriate dispute and buyer protection. Any claimed business registration or sector-specific authorisation should be checked with the relevant official registry where applicable.

EVIDENCE

- Contact and about pages: Provide the appropriate starting point for independent confirmation of the trading entity and contact channels.
- Delivery and return-policy pages: Should be reviewed for applicability to the intended order, refund conditions, and wholesale purchases.
- Checkout process: Should be checked for clear payment-protection terms before a transaction is authorised.

Summary Verdict

The overall posture is high trust and low risk, with the available content, reputation, behavioural, registration, and security signals converging on an established, apparently legitimate website. That positive assessment

does not independently prove the identity of the real-world operator.

Infrastructure Integrity

CDN/WAF protection is present, with observed CDN edge servers and a potential origin candidate. This reduces direct exposure of the service infrastructure and is a mitigating security measure, but it is not, by itself, proof of business legitimacy.

EVIDENCE

- CDN edge infrastructure: Observed edge IPs 13.248.169.48 and 76.223.54.146, both associated with AS16509.
- IP posture: Infrastructure resolution identified 2 edge IPs and 1 likely origin candidate across 3 observed IPs.

Closing Assessment

Routine browsing is proportionate to the assessed posture; credentials and payments should proceed only after the ordinary independent merchant, transaction-term, and payment-protection checks have been completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of etdbook.com.

- The request stayed on etdbook.com. It was not redirected to another domain. CLEAR
- Registration is published under 1API GmbH. CLEAR
- DNS for this domain is served by netafraz.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-02. NOTED
- The earliest public archive of this site is from 2019-11-14. CLEAR
- It is hosted on Netafraz, from a server in IR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about etdbook.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
