

Is etersoft.ru legit? TrustSniffer's high-trust assessment: 90/100

etersoft.ru

Verdict

90
OUT OF 100

HIGH TRUST

etersoft.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking Russian B2B software company site (Etersoft) offering products to enable Windows apps and crypto providers on Linux, plus licensing, support and services. Contact details and company registration details provided.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is an apparently established Russian B2B software website presenting Linux migration solutions for organizations, including software products, technical support, licensing, custom development, partner services, company information, and customer contact channels.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, malicious-content, or deceptive-financial-promise indicators. The homepage presents a coherent corporate software model centered on WINE@Etersoft for running Windows applications on Linux, RX@Etersoft for delivering desktops and applications from Linux servers, and CRYPTO@Etersoft for compatibility with cryptographic providers. The site also describes licensing, support, and development services rather than speculative investment or consumer financial products. External reputation screening found no malicious or suspicious detections, and the apparent Etersoft identity is supported by long-running domain continuity and consistent historical presence; however, the real-world operator identity is not independently verified.

EVIDENCE

- The homepage identifies Linux migration solutions, WINE@Etersoft, RX@Etersoft, CRYPTO@Etersoft, licensing, support, and custom development, with no detected phishing or deceptive-gain content.
- The domain was registered in 2003-12-09 and is 22.68 years old.
- Historical records show 410 archive snapshots spanning 2004-03-24 through 2026-08-07, covering 23 years.

Regulatory Verification Notes

The site provides company, contact, certificate, partner, and registration-related information across its corporate pages, which is consistent with a functioning B2B vendor presentation. The supplied content does not identify a specific regulatory licence or licence number; for a software provider, this is a verification and disclosure item rather than evidence of a scam. A separate broker-reputation dataset returned no match, but that contextual result is not a legal, licensing, or regulatory determination. The site's apparent legitimacy is therefore evidence-consistent, while independent operator identity and any applicable commercial registrations remain outside the supplied verification.

EVIDENCE

- The About, Certificates, Partners, and Contacts sections are present in the site navigation, and the homepage states that company registration details are provided.
- The domain registrar is BEGET-RU; the recorded registration expiry is 2026-12-09.
- The site's transport encryption uses a DV certificate issued by YE1, valid through 2026-10-18.

What to Verify Next

Before credential submission or payment, an organisation should independently match the legal-entity and registration details displayed on the site with an authoritative corporate registry and confirm that the contracting entity is the same party named on quotations, invoices, and support agreements. Any required sector-specific authorisation should be confirmed with the relevant regulator or registry, while support and payment channels should be validated through independently obtained corporate contact details and payment-protection procedures.

EVIDENCE

- The site's About and Contacts sections provide the primary identity and contact material for independent comparison.
- The site presents licensing, support, and partner-service pathways that can be checked against the contracting documentation before procurement.

Summary Verdict

Available evidence supports an established, apparently legitimate website with a high-trust and low-risk posture. The conclusion is grounded in consistent corporate content, sustained historical continuity, clean external reputation signals, and stable technical operation, but it does not independently prove the real-world operator's identity.

Infrastructure Integrity

The site is hosted directly by Etersoft-AS — Etersoft LLC, Russia, on AS198324, with no CDN detected and two likely origin addresses identified. Direct hosting is an operational characteristic rather than proof of legitimacy; the valid TLS deployment provides transport protection, while the absence of an identified CDN or WAF means there is no additional edge-layer mitigation evident in the supplied infrastructure data.

EVIDENCE

- Hosting provider: Etersoft-AS — Etersoft LLC, RU; ASN: AS198324.
- Infrastructure resolution identifies 2 unique IP addresses, 0 edge IP addresses, and 2 likely origin IP addresses; CDN presence is false.

Closing Assessment

Normal browsing and ordinary business engagement appear proportionate to the assessed posture, subject to independent confirmation of the contracting entity, applicable authorisations, and payment protections before sensitive or financially consequential interactions.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of etersoft.ru.

- The request stayed on etersoft.ru. It was not redirected to another domain. CLEAR
- Registration is published under BEGET-RU. CLEAR
- DNS for this domain is served by 95.108, across 4 name servers. NOTED
- The registration is paid up to 2026-12-09. NOTED
- The earliest public archive of this site is from 2004-03-24. CLEAR
- It is hosted on Etersoft-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about etersoft.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
