Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Ethersys is a French commercial technology-services website offering web hosting, dedicated infrastructure, systems administration, email and SMTP services, application development, IT outsourcing, and Odoo support through recurring hosting plans and paid professional services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent hosting and systems-administration business model, with human support, French infrastructure, backups, security services, and published hosting prices from €30 before tax. Technical interaction testing found no login form, hidden sensitive form, wallet activity, external posting, cloaking, or suspicious script behavior.

- Homepage: coherent commercial offering with hosting, administration, email, development, and Odoo services.
- Homepage: one contact form was present, with no sensitive fields or untrusted destination.
- Domain records: registered 2014 (11.82 years old).
- Web archive: 64 snapshots spanning 2018-08-31 to 2026-05-12, with 9 years tracked.

Regulatory Verification Notes

Ethersys provides legal and privacy links and describes its services and pricing, but no specific financial, professional, or sectoral license is claimed or verified. This is a limited disclosure point rather than evidence of deception, particularly because the published business model concerns hosting and IT services. External reputation checks found no malicious or suspicious detections, no blacklist finding, and the domain has an established global traffic footprint.

- Hosting and pricing pages: monthly service plans and paid professional services are described with starting prices.
- Legal/privacy pages: legal and privacy resources are available, while no license number is presented.
- Domain registration: registrar recorded as OVH; expiration date 2026-10-09.
- Hosting telemetry: served from AS60362 (alwaysdata - alwaysdata SARL, FR); TLS certificate issued by YR1, DV validation, valid to 2026-09-15.

What to Verify Next

For procurement or regulated use, confirm the contracting entity, applicable service terms, and any sector-specific obligations through the legal materials and an independently sourced business contact. Where a regulated service is contemplated, confirm the relevant authorization directly with the applicable registry before relying on that status.

- Homepage: published telephone support and French operating claims provide channels for independent confirmation.
- Legal/privacy pages: available materials should be matched to the proposed contract and service scope.
- Service pages: hosting tiers, infrastructure commitments, backup arrangements, and support responsibilities are stated for comparison with contractual terms.

Summary Verdict

The website presents as a legitimate, established, and trustworthy IT-services provider with a coherent operating model and no observed scam, phishing, impersonation, or malicious indicators. Normal interaction, including account login and standard service use, is appropriate.

Infrastructure Integrity

The site resolves directly to infrastructure operated by alwaysdata - alwaysdata SARL in France, with two identified IPs and no detected CDN or edge layer. Its identified hosting environment and valid TLS provide a credible technical baseline, while infrastructure protections remain a mitigating control rather than proof of legitimacy.

Closing Assessment

Standard engagement is appropriate, subject to ordinary procurement, contractual, and service-level checks proportionate to the intended relationship.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ethersys.fr.

- The request stayed on ethersys.fr. It was not redirected to another domain. [CLEAR](#)

- Registration is published under OVH. CLEAR
- DNS for this domain is served by ethersys.fr, across 2 name servers. NOTED
- The registration is paid up to 2026-10-09. NOTED
- The earliest public archive of this site is from 2018-08-31. CLEAR
- It is hosted on alwaysdata, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ethersys.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
