

Is ethnikiasfalistiki.gr legit? TrustSniffer's high-trust assessment: 75/100

ethnikiasfalistiki.gr

Verdict

75
OUT OF 100

HIGH TRUST

ethnikiasfalistiki.gr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking homepage of Εθνική Ασφαλιστική, an established Greek insurer offering consumer and business insurance, quote requests, customer support, online payments, and digital policy-management services. The page provides a registered legal name, company registry number, Athens address, telephone number, corporate email, privacy links, and extensive product information.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

The website is the corporate online presence of Εθνική Ασφαλιστική, a Greek insurer presenting health, life, vehicle, property, liability, cyber, savings, and business insurance, alongside quotation requests, customer support, premium payments, and digital policy-management services.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or other conflicting legitimacy signals were observed. The site's coherent corporate presentation, clean external threat reputation, established traffic presence, and absence of deceptive browser behavior support the assessment that it is the legitimate website it represents itself to be.

- The homepage consistently identifies Εθνική Ασφαλιστική and presents a detailed corporate-insurance service portfolio without detected brand-impersonation indicators.
- The homepage's quotation form collects personal contact information and marketing consent but has no untrusted submission destination.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no malicious safe-browsing finding and no external threat-list match.
- Interactive testing found no cloaking, wallet-draining behavior, clipboard hijacking, suspicious inline scripts, or externally submitted passwords.

Regulatory Verification Notes

The homepage provides a registered legal name, company-registry number, Athens address, telephone contact, corporate email, and links covering terms of use, personal-data processing, cookies, and reporting. This is substantive identity and governance disclosure consistent with an established insurer. The supplied pages do not establish a specific supervisory authority, insurance authorization, or licence number, so regulatory authorization remains outside the evidence available for this assessment; this is a disclosure-verification point, not an identity contradiction or indication of fraud.

- The homepage identifies the operating company through legal, registry, physical-address, telephone, and corporate-contact details.
- The homepage links to terms, privacy, cookie, and reporting materials and implements categorized consent controls for necessary, preference, statistical, and marketing technologies.
- The service navigation includes MyEthniki, WebPay, group-policy services, and intermediary portals, demonstrating distinct customer and partner workflows.

- The site's hosting infrastructure is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US); its transport encryption uses a YR1-issued DV certificate valid to 2026-10-04.

What to Verify Next

For institution-level onboarding or reliance on policy-related representations, the company-registry identifier should be matched against the relevant Greek corporate register, and current insurance authorization should be confirmed directly with the competent supervisory registry. Official contact channels should also be independently reconciled before establishing a material commercial relationship.

- The homepage supplies the company identifier and address needed for an independent corporate-register comparison.
- The site's privacy and terms links provide the appropriate documents for confirming the contracting entity and applicable data-processing terms.
- The homepage's online quotation workflow establishes a practical need to review consent language and data-handling terms before submitting prospective-customer information.

Summary Verdict

The website is a legitimate, established, and trustworthy corporate insurance presence. Its identity disclosures, coherent service environment, clean threat reputation, and benign observed behavior converge strongly, with no contradictory risk signals. Normal interaction, including account login, quotations, payments, and standard policy-management use, is appropriate.

Infrastructure Integrity

The site is protected through a trusted CDN/WAF arrangement, with the observed address operating as an edge endpoint rather than an exposed origin. This reduces direct infrastructure exposure and provides a meaningful security mitigation, although protective hosting architecture is not independently proof of corporate legitimacy.

Closing Assessment

Prospective users may proceed with normal use; regulated institutions entering a material relationship should complete their standard counterparty and authorization checks.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ethnikiasfalistiki.gr.

- The request stayed on ethnikiasfalistiki.gr. It was not redirected to another domain. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ethnikiasfalistiki.gr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
